

## Hacker School Offering a Computer Hacking Forensic Investigator Course

Are you interested in forensic investigation and want to pursue your professional career in this field? Look what this Hyderabad-based hacking school offers to its students.

**Bengaluru, Karnataka May 17, 2022 ([IssueWire.com](https://www.issuewire.com))** - Aspirants looking for a high-standard forensic investigation course in Hyderabad have great news! Hacker School, a leading hackers' training institute, is now offering the **Computer Hacking Forensic Investigator** course online and offline. In addition to Hyderabad, the institute also has its branch in Bengaluru.

Forensic investigation refers to collecting key evidence by applying forensic techniques using digital devices to detect criminal activities and carry out audits to stop future attacks. It is undeniable that cybercrime is increasing every day in today's digital world. In India alone, about [212485](#) criminal incidents have been reported in the first two months of 2022, which is higher than the total count in 2018. In such a scenario, courses like CHFI indeed play a key role.

The best thing is that it can be attended by a range of aspirants, including legal professionals, eBusiness security professionals, bankers, insurance employees, etc. While there is no strict prerequisite for this course, trainers recommend students to have completed Certified Ethical Hacking (CEH) course to gain a deeper understanding of the key conceptual areas.

When inquired about the course, one of those trainers replied, "*Our **Computer Hacking Forensic Investigation** course combines both theoretical and practical training sessions. Students will learn the intricacies required to gather the crucial evidence to help them prosecute a cyber-criminal. We have*

*designed our training modules with great care so that candidates can understand the forensic techniques quite easily. At Hacker School, our students get the opportunity to learn in a forensic laboratory setting and can practise forensic procedures on real-life operating systems. We will teach them the hard disk forensics and how to investigate the existing file systems using common digital forensic tools.”*

Apart from identifying criminal activity in the cyber world, digital forensics is also used in preserving the evidence and extracting data using scientific methods. So, joining the course will help students know and apply the important tools and knowledge in their professional field. The total course cost includes an exam voucher.

The trainer added, *“We know the importance of online education in the current world. So, if anyone outside Bengaluru or Hyderabad wants to access our course modules, they can do it happily. Online courses also save a lot of time and money. Once the course is complete, we provide a certificate that stays valid for three years. The holder can participate in EC-Council Continuing Education to extend the certificate’s validity.”*
