

Somfy Electric Blinds India For Convenient Home Décor and Enhanced Functionality

New Delhi, Delhi May 15, 2022 ([Issuewire.com](https://www.issuewire.com)) - About Somfy: An internationally recognized brand marketing smart home products like curtains and blinds, Somfy is now present in India also. They are specialized in various other types of automated and semi-automated products like shutters and screens, bollards, gates, and patio awnings.

Whether you want to raise or lower a window blind or want to have precise tilting control of the blind slats, you have now a more user-friendly and smart solution to make it happen. The [electric blinds India](#) is the latest technology embedded with an excellent design for enhancing the functionality of the blinds. These are remote control blinds from [Somfy](#) operated with the remote control device, mobile application, or a simple electric switch with the cord attached to the blind motor. You no longer need to spend time adjusting heavy blinds or adjusting the furniture to get access to the blind, a remote control is now sufficient to adjust the sunlight or street light entering your room from outside. Most of the electric or motorized blinds are custom-made by Somfy to adjust in all types of modern apartments and traditional houses.

Somfy is famous internationally for its motorized electric blinds which are the most modern products utilizing the state-of-the-art technology in this domain. All the blinds in your home can be controlled with a single remote. You can program when the blinds will open or close. At present Somfy is using two kinds of latest technologies for **electric blinds in India** – RTS, and WT. On searching their website somfy you could find an array of related products that can turn your blinds and curtains smart in a real sense.

Electric blinds have dozens of advantages. The blinds can control the sunlight and heat inside the rooms which will definitely reduce your electricity bill. The blinds can help you protect the home and the family from prying eyes that you definitely expect to maintain the privacy of the family members.

According to the spokesperson of Somfy, “we have motorized almost all types of blinds, roller, tie-up, Venetian, cellular, and many more.” The extraordinary designs and the latest technology have been integrated to provide a stylish and smart look to your home. You can use these electric blinds in your workplace as well. The motors are easy to install and Somfy promises all kinds of after-sell services.
