

Dr. Mark Vucak: Australian Plastic Surgeon Who Values Patients' Experience

Brisbane, Queensland Jun 1, 2022 ([Issuewire.com](https://www.issuewire.com)) - [Dr. Mark Vucak](#) is one of the pioneer plastic surgeons in North Queensland. Born in Kuwait, he grew up wanting to delve into medicine and surgery.

For a student who was a champion when it came to canoeing, his passion for medicine and surgery came as a surprise to many. As well his canoeing success, [Dr. Vucak](#) also loves chess. He is the Vice-

President of the Townsville Chess Club. However, he has proven beyond reasonable doubt that he is where he's meant to be. He has a track record of successful surgeries that have changed the lives of thousands of people.

After studying to become a surgeon, he worked as a surgical consultant at Royal Path Hospital, Sir Charles Gairdner Hospital, and Freemantle Hospital where he gained more extensive knowledge.

In 1994, [Dr. Vucak](#) established Queensland Plastic Surgery so that regional Queenslanders could access plastic and reconstructive procedures locally. Although he has traveled far and wide because, as his dad was an aeronautic engineer and his mum was an air hostess, he decided to set up the surgery facility in Queensland. This is because, according to him, it is better in Townsville, North Queensland than in other big cities. He also went on to establish Chrysalis Medispa in 2000. With over 30 years of experience as a plastic surgeon, Dr. Vucak has performed more than 13,000 surgeries. As a highly qualified medical practitioner, Dr. Vucak is a fellow of the Royal Australian College of Surgeons(RACS) and a member of the Australian Society of Plastic Surgeons(ASPS).

[Dr. Vucak](#) enjoys the diverse range of surgery that being a plastic surgeon allows, in contrast to other areas of medicine. Plastic surgeons are required to work on all parts of the body as the need arises. From the legs to the heart, plastic surgeons work on every part of the body with enhanced surgeries, reconstructive flaps, and microsurgery. According to him, years of experience in the field have been beneficial by helping him focus more on the patient, taking the time to get to know them and understand their needs. As a younger doctor, his focus was on the particular techniques he used. However, in the later parts of his career his focus has changed to understanding his patients as best he can.

He also likes sharing his knowledge, training, and mentoring medical students, interns, and surgical trainees through James Cook University.

After three decades as a plastic surgeon, Dr. Vucak is experienced in a wide range of procedures, including breast augmentation, breast reduction, and tummy tucks. In recent years, he has specialized in helping those who have post-weight loss issues. Often, people need tummy tucks or thigh, breast, and arm lifts due to loose skin after losing weight. After losing weight, they are left with large amounts of loose, excess skin. At Queensland Plastic Surgery, these issues are tackled effectively with the high experience and trained surgeons, including [Dr. Mark Vucak](#).

As technology improves and social media becomes more popular, surgeries are also becoming more recognized. People who have plastic surgeries often post pictures on social media, showing others to compare their results through pictures before and after the surgery. This has eased the fear that used to accompany surgeries in people's minds and has made them more familiar with the idea of undergoing surgery.

On the flip side, however, the popularity of plastic surgeries has brought a disadvantage along with it. Nowadays, there are several cosmetic doctors performing some procedures without the extensive knowledge and training of a qualified plastic and reconstructive surgeon. Sadly, many people don't understand the difference between a cheap cosmetic doctor and a qualified plastic surgeon. Dr. Vucak and the Queensland Plastic Surgery surgeons are properly qualified and experienced in the procedures that they perform.

The best part of being a plastic surgeon, for [Dr. MarkVucak](#), is helping people feel more comfortable in their bodies. He has seen how much the way people feel about themselves affects every aspect of their lives.

According to Dr. Vucak, the smile and satisfaction of his patients after surgery gives him immeasurable joy. He understands that every aspect of people's lives changes when they begin to feel good about their bodies.

When he is not busy with surgeries, Dr. Vucak loves spending quality time with his lovely family. For him, bonding with his family in a very beautiful environment like Queensland is such a wonderful combination. Dr. Vucak has no plans of leaving North Queensland any time soon as he prefers it to large cities like Sydney and the likes.

“I have lived in many cities and countries but I think we have it so good in Townsville, in North Queensland”, he said, while talking about his environment in an interview.
