

Homefix Custom Remodeling Helps Bring Sustainable Energy to Baltimore by Way of GAF Timberline Solar Shingles

GAF Energy offers Timberline Solar™, the only roof system in the world to directly incorporate solar technology into traditional roofing installations. This advanced system allows for a sleek solar roof that is cost-effective, and easy to install.

Columbia, Maryland Jun 3, 2022 (Issuewire.com) - Homefix Custom Remodeling is now authorized to sell the first-ever solar shingle. Homefix's long-time partnership with roofing giant, GAF, has brought this product to Homefix and a limited amount of roofing contractors this year. This new technology allows homeowners to get a new roof and solar panels with the solar panel issues. Timberline Solar™ is the only system to directly integrate solar technology into traditional roofing processes and materials and is the world's first nailable solar shingle. This product allows homeowners a new solar roof as a roofing product and a solar energy product — the first of its kind to be recognized as both. There are no panels or holes that need to be drilled into the roof, which means no damage to the roof or ways for critters to get into the client's home.

Homefix is installing their first solar shingle roofs and GAF will be attending the installation on June 7 in Moyock, NC, and June 13, 2022, in Owings Mills, MD.

GAF TIMBERLINE SHINGLES
Timberline Solar from GAF Energy means the world's first shingle solar shingles, so you can harness the power of the sun with a solar shingle roof that looks like a traditional roof and generates clean energy. The Timberline Solar™ roof is made of solar shingles and is backed by a 25-year warranty.

"We are on a mission to help as many people as possible harness the power of the Sun with a GAF Solar Roof from Homefix!"
