Secure and Decentralized Staking Platform

BDC aims at delivering a decentralized smart network for DAPP and Gaming development. According to C.E.O, the project aims to switch from the current BNB/USDT to a native substrate token with Decentralized governance.

BDC is also considering making a secure gaming platform that maximizes the value of data while ensuring data privacy by separating data ownership from data usage, Where you can use your BDC tokens to play the games and win rewards and withdraw them in BNB/USDT.
