QROAD, Taking Blockchain Game QA Experience to the Next Level

Seoul, South Korea Jul 11, 2022 (Issuewire.com**)** - QROAD, a game quality assurance(QA), and operations service provider will expand and strengthen support services for blockchain games globally.

In line with the recent growth of P2E, NFT(Non-fungible token), and Metaverse games, QROAD provides QA services, e-wallet services, security QA services, and NFT transaction certification, optimized for blockchain companies.

The company also provides Global QA services in more than 20 languages through a global service center located in the Philippines to meet the needs of global blockchain companies.

Moreover, the P2E game service supports Discode Bots and engages in 24-hour support by using

Telegram Messanger. Providing seamless communication with the gaming community,

With experiences in platforms like WEMIX, ISKRA, and Tangled, QROAD Nam-Yong Byun said, "QROAD has accumulated know-how in understanding blockchain technology through working closely with major blockchain companies."

QROAD currently provides services through partnerships with major blockchain companies in the P2E market, including Wemade and ISKRA.
