

## The Increase In Use Of Heavy Aircraft

**Boston, Massachusetts Jul 27, 2022 ([IssueWire.com](http://IssueWire.com))** - In 2022 consumers have the freedom to purchase, order, or reserve, practically anything with a click of a button. Buying has never been more transparent through the utilization of mobile app technology. Typically, users can perform tasks such as booking a hotel or purchasing game tickets all from an app; so it only makes sense that one can order a private aircraft to get anywhere, and at any time using the UberJets LetsJet App! UberJets puts the power of the Virtual Hangar in the palm of your hand. You can now reserve a completely customized private aircraft as easily as ordering a pizza...

UberJets leads the private aviation industry in private jet booking technology allowing its members to have the quickest access to any and all aircraft they would wish to fly on from our state-of-the-art [Virtual HangarSM](#). Inside the highspeed, the [Let'sJet app](#) powered by UberJets members has the power at their fingertips to click and travel anywhere all over the globe.

As July comes to an end and UberJets is transitioning into its preparation for August they will be focussing on the movement of heavy aircraft. UberJets has seen an incredible increase in heavy aircraft booking in the last month due to the popular travel time despite the dog days of summer.

The private flyer population during this time of year tends to have more people flying with them as their families have time off to enjoy summer which raises the need for heavy aircraft. Along with that factor, there is also a higher volume of flights that are going from coast to coast with the need for an aircraft that can travel long distances.

UberJets is again able to stay ahead of the curve with this migration of heavy aircraft use in the industry due to the advanced technology behind the virtual hangar platform. There is no charge or hurdle that UberJets needs to take account of with this shift, as the Virtual Hangar platform gives the user the ability to choose any aircraft they like for any trip that they may have.

With the use of heavy aircraft comes the problem of runway length which may or may not allow certain aircraft of that size to land at certain airports. Although this is not a problem when flying with UberJets because the Virtual Hangar platform will always tell you what surrounding airports are in your area giving you the ones with the valid runway lengths that you can fly into.

Flying with UberJets allows for flying anytime, anywhere, and on any aircraft a breeze with a few simple clicks of a button. Fly with you soon!
