AUDIT REPORT - <https://rapidnetwork.io/Rapidnetwork-Analysis-Report.pdf>

## TRANSPARENCY

You can transparently view all transactions and details that have been made since the date the Smart Contract was created.

## HIGH SECURITY

Smart contracts are a part of Blockchain technology. Blockchain is a secure technology that no hacker can access.

## DECENTRALIZED

RapidNetwork is Fully decentralized and most reliable it is Impossible to change after deployment and zero human intervention possibility. It is Authentic, Transparent, and private simultaneously. No control of any organization or person. It is the Cheapest way to execute the program.

## **100% Fund Distribution**

### **What is RapidNetwork?**

RapidNetwork is a totally decentralized ecosystem with global networks, training, and an international community that consists of such community support, marketing programs, etc.

### **What is RapidNetwork Smart Contract?**

RapidNetwork is a global community development ecosystem that enables a new system and a completely digital asset. It is a decentralized peer-to-peer network that is powered by its users with no central authority or middlemen. From a user perspective, RapidNetwork is designed to provide everyone with an Independent financial foundation based on Tron Blockchain and smart contract technology.

### **How to participate in RapidNetwork?**

#### **STEP 1:**

Setup your wallet on mobile by downloading App from the App store & Play store (Tronlink pro, Klever, Token Pocket).

#### **STEP 2:**

Once you have downloaded it, you need to move some Tron (trx) coins into the wallet, you only need 100TRX to get started or buy more Trx to your wallet with as much you want to invest. If you do not have any Tron you can buy some on Binance, or whichever exchange you prefer to use in your country. Once you have your Tron (trx) coins in your Tron link wallet you can sign up to RapidNetwork.

#### **STEP 3:**

Open the DApp browser in your wallet, a search engine for decentralized applications, and follow the referral link from your sponsor.

Note: If you don't have a sponsor id, by default you will be registered.

#### **STEP 4:**

Click on "REGISTER" with RapidNetwork.io check your upline sponsor id, and re-verify if necessary. Then click on "LOGIN"

#### **STEP 5:**

Next, click on "INVEST NOW" and enter a Minimum of 100TRX or as much you want to invest, then you will need to enter a password and confirm the transaction in the wallet. (Tronlink Pro, Klever, Token Pocket)

## **STEP 6:**

Wait for confirmation on the TRON network. After the transaction is approved, refresh the page and you can see

all your details in "Personal Statistics".

## **ALERT!**

In your wallet (Tronlink pro, Klever, Token Pocket) you should have a minimum of 30-50 TRX more on your wallet, or your transaction will get out of energy status!

\*RapidNetwork system follows GMT ±00:00 Time zone, add your local time accordingly.

## **Who controls the RapidNetwork network?**

Nobody owns the RapidNetwork network much like no one owns the technology behind email. RapidNetwork is controlled by all participants around the world. While developers are improving the software, they can't force a change in the smart contract built on the Tron blockchain because all users are free to choose what software and version they use. In order to stay compatible with each other, all users need to use software complying with the same rules. RapidNetwork can only work correctly with a complete consensus among all participants. Therefore, all users and developers have a strong incentive to protect this consensus.

## **Is RapidNetwork really used by people?**

Yes. There are a growing number of businesses and individuals using RapidNetwork. This includes brick-and-mortar businesses. While RapidNetwork remains a relatively new phenomenon, it is growing fast.

## **Why do people trust RapidNetwork?**

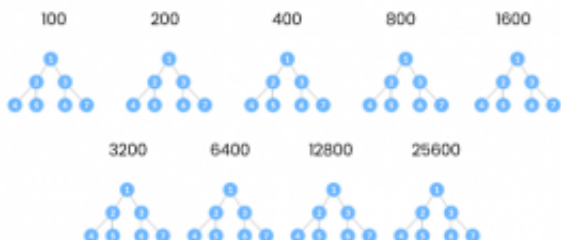

Much of the trust in RapidNetwork comes from the fact that it requires no trust at all. RapidNetwork is a fully open-global community development ecosystem and decentralized. This means that anyone has access at any time. Any participants in the world can therefore verify exactly how RapidNetwork works. All transactions can be transparently consulted in real-time by anyone. All transactions can be made without reliance on a third party and the whole system is protected by heavily peer-reviewed cryptographic algorithms like those used for online banking. No organization or individual can control RapidNetwork, and the network remains secure even if not all of its users can be trusted.
