

The most revolutionary tool ever invented for sporting goods

The AR-Takedown Tool, the only full disassembly and reassembly AR-Platform tool on the market, has been voted number one at Shot Show 2022, the largest trade show of its kind in the world.

AR-T TAKEDOWN TOOL

Spokane, Washington Jul 13, 2022 (Issuewire.com) - AR-Takedown Tool, a market game-changer, was voted as the Number 1 New Invention at Shot Show 2022

The AR-Takedown Tool continues to revolutionize the sporting goods industry by introducing a novel all-in-one device to completely disassemble ARs. The AR-Takedown Tool, the only full disassembly and reassembly AR-Platform tool on the market, has been voted number one at Shot Show 2022, the largest trade show of its kind in the world.

"The Takedown Tool was a complete success at Shot Show 2022. It's exhilarating to know that the Tool will be used around the world to ensure people can stay safe in their homes, businesses, and properties," a representative said in a statement.

No larger than a writing pen, the AR-15 Tool can offer more than 5000 PSI when required, which is excellent for dealing with any firearm. The AR-Takedown Tool features an innovative design dubbed as the only tool AR enthusiasts need to disassemble their rifles quickly, easily, and completely.

The design is the size of a pen, making it simple to include in a case or even a pocket and replacing pivot pin tools, punches, and mallets. As a result, it's likely to completely strip an AR in the field in less than a minute.

"The AR-15 Takedown tool uses patented technology that helps remove and assemble pins without using clunky tools. This kind of revolutionary technology hasn't been around in the firearms industry for decades, which is why the AR-15 Takedown tool is so unique," the representative added.

The AR-Takedown Tool is completely made in the United States from U.S. steel and comes with a limited lifetime guarantee.

In a review, Gun Nutt, a verified customer, called The AR-Takedown Tool the most innovative design for an AR-15 since the AR-15 came out.

"It works on my AR-15 and AR-10 flawlessly. Thank you for the timely delivery and cool product. I'll definitely be buying more for my tactical group," writes Gun Nutt.

James Schroeder, another verified customer, wrote: "This should be in every AR-15 owner's hands or any modern gun with pins for that matter."

Nate, meanwhile, said the AR-Takedown Tool offers much higher quality than he thought.

"Most things nowadays aren't made to the same standards as they used to be. This Tool is the exception," Nate writes.

However, this is not the only high-end brand offered through the new online ammo retailer, All About Bullets. The new website exclusively features two other brands: G9 Defense and The HIT Tools.

G9 Defense is a leader in developing specialized munitions for the civilian market and military and law enforcement, with various ammunition in the most popular rifle and handgun calibers. The HIT Tool is another quality brand manufactured in the U.S. with entirely U.S.-made materials.

Hunting and gun enthusiasts alike will find these brands and more through the new online business that specializes in offering high-quality ammunition and gun accessories.

Those who wish to learn more about The Takedown Tool may visit the website and its social channels for more information.
