

## Two Teen Sisters Launch the Young Entrepreneurs School To Help Young Adults Make Their First Six Figures Online

The Young Entrepreneurs School Provides Young Adults the Step by Step Roadmap to Ultimate Online Business Success Despite a Looming Recession

**Fort Worth, Texas Jul 20, 2022 ([Issuewire.com](http://Issuewire.com))** - “Our program helps young teens and adults create an online business through multiple paths, all of which bring passive income. We have built each program out in detail and provided the step-by-step blueprint to help our students succeed AND we have a ton of fun along the way!” says Maddie Cawley.

The newly launched Young Entrepreneurs School, launched in May of 2022, helps young entrepreneurs navigate the crazy maze of making a six-figure income online through selling physical and digital products. Due to high demand and the early success of the launch, 21-year-old Maddie Cawley, CEO of The Young Entrepreneurs School, is already planning curriculum expansion with programs on real estate investing, gold bot investing, crypto, leadership/business fundamentals, and more.

The school is the brainchild of sisters Maddie (21) and Skylar Cawley (18), who made over \$160,000 in their very first year with their online business during the middle of the pandemic. Both girls took the plunge and left their athletic and academic scholarships to college, to pursue their own dreams of financial freedom and location independence. Now, they are sharing their secrets to success with other teens and young adults globally, with the goal of exposing the opportunities that lie within entrepreneurship and teaching others in their generation how to start, manage and grow an online business.

The Young Entrepreneurs School caters to young entrepreneurs between the ages of 14-24 who seek alternative options to make sustainable income online.

Maddie and Skylar grew up in an entrepreneurial household and while they both gave college a try for a semester, they realized that they were ultimately seeking more location independence, time freedom, and income than what a 9-5 “traditional” job could offer.

“Our program helps young teens and adults create an online business through multiple paths, all of which bring passive income. We have built each program out in detail and provided the step-by-step blueprint to help our students succeed AND we have a ton of fun along the way!” says Maddie Cawley.

Their programs go beyond anything currently on the marketplace for entrepreneurs and offer access to simple guides for fast implementation, templates, resources, contacts, quick start workbooks, and other tools to help students achieve their goals faster and easier. There is also a VIP Facebook group for networking and sharing experiences as well, which encourages networking and accountability.

The Young Entrepreneurs School offers specialized education and instruction to give all students outside-of-the-box opportunities. Yes recognizes that each student is unique and that a one size fits all approach is not ideal, and because of that our programs were tailored to help every student, no matter where they may be in their journey.

“Our program helps young adults create an online business that brings in passive income. We offer not one, but multiple programs.” – Skylar Cawley.

This program was designed for teens and young adults who have decided to pursue a different path in life other than a 4-year college degree or a 9 to 5 in-office job. Those that want more time freedom, location independence, and long-term financial freedom. Those looking to give up a routine job that doesn’t pay well, for something better, and who don’t want to settle for mediocrity. Those that want more out of life and who are interested in making what is thought of as impossible, possible.

“Before finding The Young Entrepreneurs School I found myself lost and confused, trying to find a way to be able to make money for myself at such a young age. This program has given me a new outlook on what I can create for myself. Through this program, I am learning not only new ways to make money but all of the skills necessary to create the future that I have always looked forward to. I am excited to continue to learn and grow through these courses provided by and designed for young entrepreneurs,” says Nathan Dufresne, a student at the Young Entrepreneurs School.

For teens and young adults wanting to learn online business skills that can truly transform their lives, the Young Entrepreneurs School is a viable option for many across the globe.
