& PESTLE

Werribee south, Australia Aug 31, 2022 ([Issuewire.com](https://www.issuewire.com)) - Kava can be drunk in everyday life as it has a lot of advantages. But, the effects and side-effects of kava rely on its preparation method. Kava is known for its relaxing properties, capacity to foster sociability, and a sense of peace without impairing mental clarity. Kava drink assists to relax the body after hard work and reduces tiredness. Moreover, you will be able to think and listen to your thoughts after drinking kava. Kava drink assists to open your mind, and you make decisions calmly.

Words from the founder, “providing the high-quality noble kava powder to our customers is our only aim. By maintaining a close working relationship with the grassroots farmers and applying the latest technology to sustain a high standard of processing, we ensure our products' quality. We at Root & Pestle is constantly working together to enhance quality control practices around the harvesting and transportation of raw product. To provide quality and the best kavalactone content, our farmers harvest only mature noble kava plants. We also match supply with demand so our kava is delivered, processed, and packaged within a day of harvesting to impound taste and freshness.

About [Root & Pestle](#)

A kava processing company with the product line “Klin Kava” is established by John Fordham in 2005. After failing several times, John Fordham started the business from his residential kitchen. Instead of countless destructions and failures. John Fordham made the first instant kava product commercially sold in the industry. Furthermore, a series of traditional Vanuatu kava powder products is also created by John, which became highly demanded worldwide. To get superior recognition for our products, the founders launched Root & Pestle as a retail arm and distinct brand representing our offer in the Australian and New Zealand markets.
