

## Island Sweetwater Beverage Company Launches “Cacao's Island” Brand of Chocolate and Madagascar Vanilla Coconut Milk

**Kahului, Hawaii Aug 19, 2022 ([IssueWire.com](https://www.IssueWire.com))** - Island Sweetwater Beverage Co., Inc., announced today the launch of their newest innovation, Cacao's Island™ brand of Chocolate and Madagascar Vanilla Coconut Milk, available now in select markets. Made with real Madagascar Vanilla Beans direct from the original source and supplier. Our Chocolate Coconut Milk uses Hawaiian-grown Cacao (Pronounced ka-KOW. Theobroma is Greek for “food of the gods.”) from Mauna Kea Cacao off the “Hāmākua Coast” on Hawai‘i’s Big Island, The Hāmākua Coast is one of the most beautiful stretches of scenery on the island. With nearly 84 inches of rainfall a year, the region boasts lush tropical rainforests, stunning waterfalls, and tranquil green valleys, perfect for growing Cacao. The ready-to-drink line expands Island Sweetwater’s emerging Functional Beverage space, providing better-for-you options in a variety of flavors.

The company is quietly launching its first two products in Hawai‘i’s “ABC Stores.” The chain was started by Sidney Kosasa, who opened his first store in Waikiki in 1964. “Surprisingly, we found that people who may not prefer the taste of coconut milk by itself, overwhelmingly enjoyed the refreshing cacao pod taste of our Cacao's Island Chocolate Coconut Milk,” said Co-Founder John Ramonett Gonzales. “Cacao's Island Chocolate Coconut Milk has less sugar and more protein than regular chocolate dairy milk. And because they're 100% animal-free, they're kinder to old moo cows and will dramatically cut the greenhouse gas pollution from commercial dairies on Mother Earth,” noted Gonzales. “A commercial Ben & Jerry's dairy with 10,000 milk cows will generate an average of 3,575 pounds of ammonia, 33,092 pounds of methane, and 409 pounds of nitrous oxide every day,” explained Gonzales.
