Chennai, Tamil Nadu Aug 11, 2022 (Issuewire.com) - Etica Developers is one of the most prominent builders in the premium budget housing section in Chennai. Established in 2012, their expertise in the real estate vertical allows them to uphold the highest professional construction standards, along with an intricate eye for detail. They are particularly well known for their luxury offerings and are well praised for their after-sales service.

They lay a particular emphasis on biophilia - the tendency for humans to connect with nature, and have

incorporated biophilia in their designs. They're quite literally proficient in bringing the outdoors inside.

They are known for multiple projects, starting from Etica Srinidhi in Nandhanam (Chamiers Road), Etica Malar in Nungambakkam, and Etica Vijaya in T.Nagar, Etica Seven Hills, and Etica Valeria in Alwarpet.

Their prime motives are to construct and deliver premium, luxury, housing projects for future residents scattered across South Chennai - from thiruvanmiyur to Kottorpuram, from T-Nagar to Nungambakkam, from Alwarpet to Vijayanagar - Etica developers have created superior projects all across the city.

"Etica is the result of years of understanding both the industry and self," says G. Diliban (title), of Etica Developers. "We are now one of the prominent builders of luxury homes in South Chennai. With the finest consultants working on the projects, Etica revels in the fact that it has the shortest time to delivery. Every home by Etica is carefully sculpted to satisfaction and is given as much attention to detail as if it were my own home"

Being a part of RD associates, Etica draws from the experience of the 30-year-old company. Since its inception in 2012, Etica developers have planned over 5 lakh square feet of development.

"I have made it my life's mission to make every Etica property worthy of being home. We need to understand the importance of privacy and contradicting need to feel as one with both nature and community." adds G. Prakash, (title), of Etica Developers, "We ensure that every wall, window, and balcony speak to these needs".

The parent company, RD associates have over a million square feet in civil, plumbing, and fire-fighting projects.
