

WHOMP CORPORATION Files Provisional Patent Application for it's "BUZZ PEANUT BUTTER"

– The World's First – Caffeinated Peanut Butter invented by – Richard H. Davis, President and CEO of WHOMP CORPORATION.

Albany, Georgia Aug 16, 2022 ([Issuewire.com](https://www.issuewire.com)) - WHOMP CORPORATION announced today the filing with the United States Patent and Trademark Office of a provisional patent application covering the utilization of caffeine-infused peanut butter. Richard H. Davis, President and CEO of WHOMP CORPORATION, and the inventor of BUZZ says it's the world's first caffeinated peanut butter. "A

recent study from the University of South Australia found daily consumption of lightly salted peanuts twice a day before meals led to weight loss, lowered blood pressure, and improved fasting glucose levels, perhaps by incorporating the “workingman’s lunch” which is Planters Peanuts mixed into a Dr. Pepper, very popular during the Depression into their peer-reviewed study, may have improved the desired weight loss results,” noted Davis. “Adding caffeine to peanut butter is the same as mixing Mr. Peanut* goobers with a caffeinated Dr. Pepper, which is still a Confederate tradition here south of the Mason-Dixon Line,” explained Davis.

"Peanuts are nutrient-dense and illustrate the concept of food as medicine," said Dr. Samara Sterling, research director for The Peanut Institute. "When you eat peanuts and peanut butter, you're ingesting three macronutrients – protein, fiber, and healthy monounsaturated and polyunsaturated fats – and 19 micronutrients. Regularly choosing foods that contribute to your overall health is a positive action that can deliver life-long benefits."

About Richard H. Davis

Richard H. Davis is a prolific inventor and entrepreneur and a United States Merchant Marine and combat veteran. As a yacht-delivery skipper during the United States Invasion of Panama, Davis ended up in the crossfire and tells his story in his unpublished manuscript “Sailor of Fortune”, which chronicles his adventures at sea and land on the Motor Vessel Kamillian. In addition, Davis is a photojournalist for Soft Drinks International Magazine in Britain. Davis has appeared on such national and regional media broadcasts including CBS News, NBC News, Fox News, and ABC News, and in The New York Times, and many others.

About The Peanut Institute

Based in Albany, Georgia, The Peanut Institute is a non-profit organization supporting nutrition research and developing educational programs to encourage healthful lifestyles that include peanuts and peanut products. The Peanut Institute pursues its mission through research programs, educational initiatives, and the promotion of healthful lifestyles to consumers of all ages. As an independent forum, The Peanut Institute is uniquely positioned to work with all segments of the food industry, the research community, academia, consumer organizations, and governmental institutions. For more information on peanuts and peanut butter and their impact on health, visit <https://peanut-institute.com>

Editor's Note: *Mr. Peanut is the advertising logo and mascot of Planters, an American snack-food company owned by Hormel. He is depicted as an anthropomorphic peanut in its shell, wearing the formal clothing of an old-fashioned gentleman, with a top hat, monocle, white gloves, spats, and cane. He is reported of British heritage and has the proper name of Bartholomew Richard Fitzgerald-Smythe. The Mr. Peanut icon first appeared in 1916 advertising and was portrayed as a racist peanut plantation owner, but is actually a black person performing in Whiteface. Placing peanuts in your Dr. Pepper is done for two reasons. One, the peanuts make your Dr. Pepper fizz. And two, it tastes good. The salt from the peanuts cuts the sweetness of the soda, plus it's entertaining to have a bit of crunch in your mouth as you sip.
