

# Dangbei Mars Pro Review: 4k home projector brings you a new world

This article will review the Dangbei Mars Pro, a full-featured 4k home projector, from several perspectives.

**New York City, New York Sep 6, 2022 ([Issuewire.com](http://Issuewire.com))** - Many people may not have heard of the brand Dangbei, let alone their product, the [Dangbei Mars Pro](#). This article will review the Dangbei Mars Pro. Hope that after reading this article you will have a new appreciation for Dangbei and its excellent home projector——Mars Pro.

The [Dangbei Mars Pro 4k laser projector](#) is impressive from its exterior design to its internal systems and its performance. Have a 4k home projector like this to enjoy a great movie night and a high quality of life.

## Brightness

Dangbei Mars Pro [4k home projector](#) uses ALPD laser technology with a brightness of up to 3200 ANSI Lumens, which allows you to see a clear picture even in areas where there is light. This flagship projector has 4K Ultra HD resolution with 8.3 megapixels and four times the clarity of a 1080P projector. This means you can have a great movie night in your backyard.

It's also worth noting that this projector supports HDR10+ High Dynamic Image

Technology which combined with 3200 ANSI lumens of brightness and 4K picture quality, allows for more perfect reproduction of HDR video light and shadow effects. Bringing you the most wonderful new world of movies.

## Setup

Dangbei Mars Pro not only has excellent picture quality, but its hardware configuration is also very different. Dangbei Mars Pro upgrades the configuration to provide users with a large RAM 4GB+ ROM 128GB. This allows users to download various files and applications without worrying about slowing down the system, satisfying more of their needs.

This [4k laser home projector](#) supports auto-focus and auto-keystone correction, allowing users to easily adjust to the perfect screen size. the Dangbei Mars Pro has auto-obstacle avoidance technology, which can identify obstacles to the screen and achieve the best-positioned screen. In addition, Mars Pro is certified by TÜV Rheinland for low blue light, which effectively protects the human eye.

## Appearance

When you first see this projector, you will be amazed by its subtle design.

This home projector is elegant and noble with a black tone, an aircraft aluminum shell, and a 2.5D nano skin-friendly glass top cover.

On the front of the projector is a piece of industrial-grade wear-resistant jeweled glass that covers the lens module TOF+CMOS camera module, protecting them from wear and tear and dirt. In addition, there are two gold silk-screened logos: "4K ULTRA HD" and "Dangbei" in the upper left and lower right corners, making the projector more refined and beautiful.

On both sides of the projector is a large mesh structure that hides the dual 10W full-range speakers and heat sink module, providing excellent sound quality while ensuring efficient heat dissipation for a great movie night experience.

On the back of the 4k projector, you will also find many interfaces which are:

- 2 HDMI
- 2 USB 2.0
- 1 RJ45 LAN
- 1 3.5 mm earphone port
- 1 S/PDIF

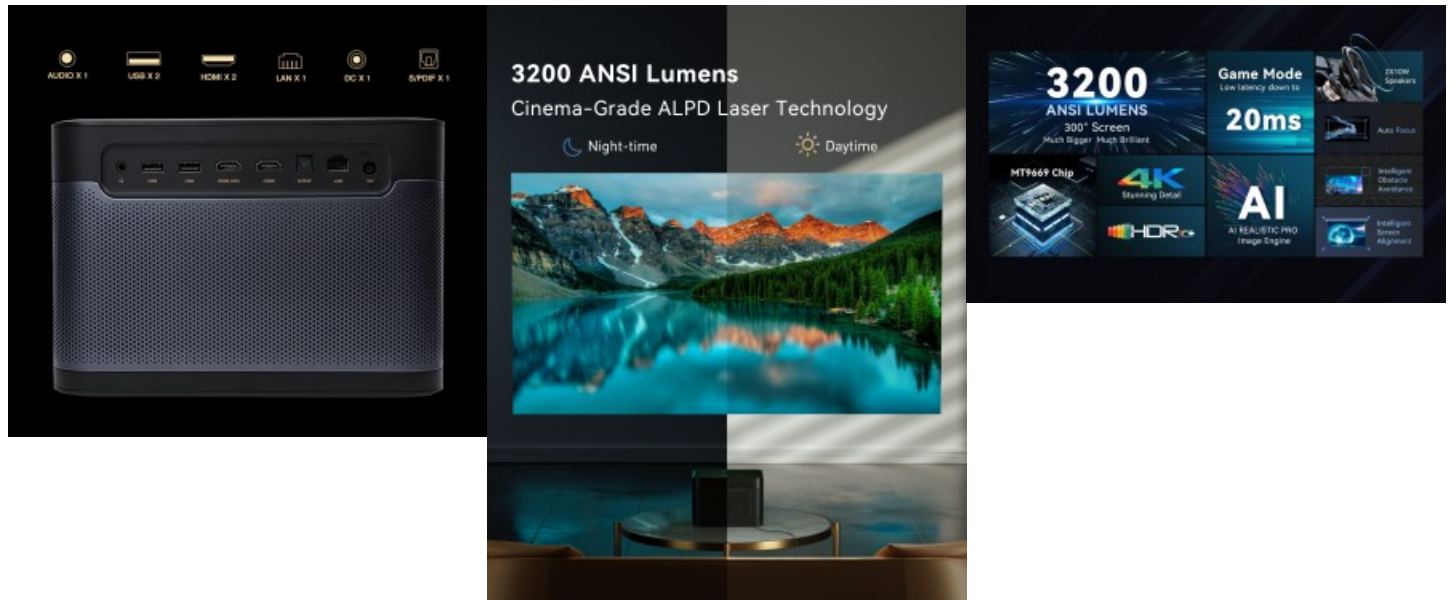

Therefore, many other kinds of devices such as game players and game controllers, TV boxes, and computers can also be easily connected to these interfaces very quickly.

## Price

[Dangbei Mars Pro](#) laser projector now boasts a \$200 discount to \$1699. A surprise gift will also be given after unboxing.

## Conclusion

A [laser projector](#) that is below market price but high-quality is hard to come by. The sophisticated look allows you to use Dangbei Mars Pro as an ornament when not in use, adding a sense of style to the space in your home. Its high-quality details will give you a great movie night and create a whole new world.
