

## Dangbei Mars Pro Review: a worth buying 4k movie projector

This article will review the Dangbei Mars Pro, a 4k movie projector worth buying, from the following aspects.

**New York City, New York Sep 25, 2022 ([Issuewire.com](http://Issuewire.com))** - Many people want to buy a 4k movie projector for their home, but there is a dizzying array of projectors on the market leading to they don't know how to go about picking the right one. So, what should you consider before buying a projector?

In this article, we will introduce you to the [Dangbei Mars Pro](#), which is a 4K movie projector. Even if

you're not looking to buy the device, read on to imbibe in-depth knowledge and perspective about home entertainment.

## [Dangbei Mars Pro](#) Design

When it comes to appearance, this flagship projector features a black aircraft aluminum casing that incorporates a 2.5D nano glass cover for an exquisite look.

On the front of the Dangbei Mars Pro is a piece of industrial-grade wear-resistant jeweled glass that covers the lens module TPF+CMOS camera module underneath, keeping it free from wear and keeping it clean. In addition, there is a gold 4K ULTRA HD silkscreen in the upper left corner, which coordinates with the gold Dangbei logo in the lower right corner, making the whole projector even more elegant and high-end.

The Dangbei Mars Pro home projector is flanked by a large mesh structure, underneath which are 10W large-cavity full-range speakers and a cooling module that provides the best sound quality while ensuring efficient heat dissipation.

There is a rich row of ports on the back of this home projector containing: a power port, a wired network port, a S/POIF audio output port, an HDMI port, an HDMI/ARC port, two USB ports, and a 3.5mm headphone jack. Whether connecting external speakers, and monitors or using storage devices to play audio and video, there is ample interface hardware support.

## Dangbei Mars Pro Picture Quality

Moving to the image quality of this [4K laser home projector](#), we see that it's vivid and clear, with all the details displayed brilliantly. This theatre projector has not only 4K resolution but also has **3200 ANSI lumens** brightness. What does this mean? Well, it projects clear, bright, and distinct colors on the screen not just under indoor lighting, but also under ambient lighting and in broad daylight.

This home laser projector provides a whole experience with its **300 inches** of screen projection and an amazing viewing experience. It has multiple inbuilt features, like auto keystone correction, autofocus, intelligent screen alignment, and also intelligent obstacle avoidance. This saves the user from adjusting these things on their own, as they are already inbuilt to auto adjustment for a quality experience and great quality image.

It even has the **TÜV Rheinland Low Blue Light Certification**. This certification is provided under the promise that the projector is more caring for the human eye in comparison to the other ones available in the market.

## Should you buy the [Dangbei Mars Pro](#) movie Projector?

Sure, it has a built-in speaker, so not only do you save money on an extra speaker, but you also save space in your home for installation, making the Dangbei Mars Pro a portable projector.

This [4K laser projector](#) has an MT9669 chip (flagship), along with **4G RAM and 128 ROM**. It is easy to operate and configure for its users, allowing them to download multiple files and videos. It has an in-built UI assistant and operates the **Android 9.0** system. The design and outlet are sleek, yet simple, with various detailed features, including time, weather and memory status, etc.

It offers **Bluetooth 5.0** along with 2.4G/5G Wi-Fi connectivity, which is even smoother to connect with, with its quick wireless connectivity option. The sound system on the Dangbei Mars Pro is of **two 10W speakers**. The projector system supports Dolby Audio and DTS for clear sound.

If you're someone who plans on using this at home, in the backyard, or even taking it with you when traveling, this is a good enough projector for most people. And in some cases, it's a better alternative than what most people already have with their home's TV setup.

All in all, with its many distinct, futuristically innovative features and amazing memory space, the [4K movie projector](#) is value for money in the existing market this year. With its amazing processor and UI features, it is available for \$1,699, which is a decent price for the market it is competing in with its many specs.
