

Global Digital Technology Token (GDTT) - A New Age Of Tech Crypto

Los Angeles, California Sep 5, 2022 ([Issuewire.com](https://www.issuewire.com)) - The Global Digital Technology Token (GDTT) ecosystem is a new development format for tech start-ups and innovative projects, whose economic model is based on crypto and blockchain technologies, monetization, and tokenization. As well as businesses that are looking for international promotion and support.

GDTT's future prediction is to reach 1 million people in the next 5 years.

The GDTT's global goal is to bring positive change to Tech business, the economy, and society.

- 1) The Global Digital Technology Token (GDTT) platform, which uses proprietary blockchain and digital assets. The platform is a global information portal for digital crowdfunding, working in conjunction with the Global Digital Technology Token (GDTT) exchange.
- 2) Networking with infrastructure to support innovative projects and start-ups with information, technical, legal, and accounting assistance at all stages of preparation and implementation.
- 3) Digital Global Digital Technology Token (GDTT) exchange of secured and unsecured virtual assets, formalized by local legislation. The Exchange hosts and trades assets of Tech start-ups and Tech projects in token/GDTT and GDTT/top pairs.

Global Digital Technology Token (GDTT) is currently working on 4 project
