

One Family One Subscription: Revolutionizing the Education

Flexible learning in Educational, Professional, and Creative Courses

Mumbai, Maharashtra Sep 3, 2022 (Issuewire.com) - Letstute (Universal Learning Aid Pvt. Ltd.) is a Mumbai-based E-learning firm.

From the outset, the mission has been to have a meaningful and beneficial effect in the education sector by giving high-quality educational information to anybody who wants to investigate, visualize, and apply their learning in real life.

Online courses enable anybody, from anywhere, to master new skills or polish current ones. Learning new talents expands one's repertoire and improves the ability to complete a task efficiently. Employers will also appreciate a candidate more if they invest time in honing their abilities and staying current and creative.

The best way to do this is through online courses. Online courses offer flexibility and one can study any time they want and with whomever they want.

What better way to learn and have fun than with family?

In addition, spending time with family builds confidence for all of its members. Letstute thus offers educational and engaging family plans as follows:

- *The Bronze Plan: 1 month*

- The Silver Plan: 3 months
- The Gold Plan: 6 months
- The Platinum Plan: 12 months

Unlike many online courses, where one pays for each plan separately, this integrates all in one.

They provide students and professionals with 700+ hours of valuable content, a course completion certificate, and access to upcoming courses for just ₹199/- per month.

The key elements are the Self-Explanatory and Problem Solving videos, useful for Students,

Professionals and Entrepreneurs. The courses are also curated and precisely designed to suit students, Homemakers, Professionals, and Entrepreneurs.

Anybody can access the courses online at any time on any device like Mobile, Tablet, or Computers.

Studying should not be a chore, but rather a pleasurable and exciting experience. Letstute utilizes many real-life examples to clarify topics since they must be understood rationally.

The information is generated after numerous stages of evaluation by the topic specialists since we prioritize quality.
