

Staxe Launches its first NFT Collection for its Founding Community

Innovative web3 ecosystem for creatives, Staxe, announces the launch of its genesis NFT collection featuring PFP-style generative artwork with several utilities for holders.

Valencia, Spain Sep 13, 2022 ([Issuewire.com](https://www.issuewire.com)) - The team at [Staxe](https://staxe.com), led by founder Luis Martinez, is leaving no stone unturned in connecting the different stakeholders in the music industry with the

upcoming launch of an NFT collection for the network's founding community. Staxe was created to connect artists and fans using blockchain technology and NFTs, enabling them to share earnings and royalties while also helping build and engage the resulting token-gated communities.

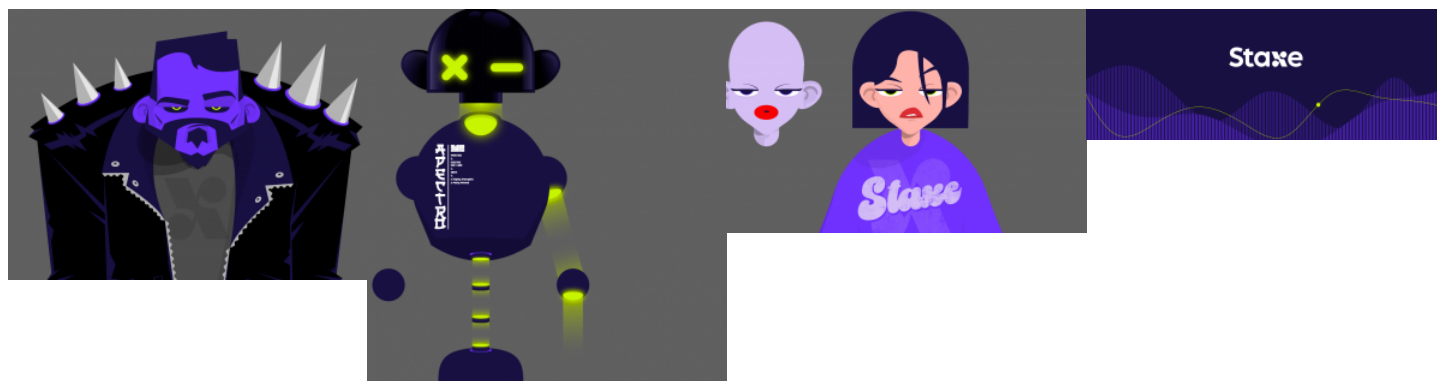

The global NFT market continues to grow, as more projects emerge to increase the use cases of non-fungible tokens. However, the team building Staxe seeks to take the experience a notch higher for artists and their fans with unique content and access to special events both In-Real-Life as well as in the metaverse/virtual streaming space, VIP memberships and privileges, whitelisting, and early access to Staxe's network token sale: [STXE](#). The company's subsequent launch of an NFT collection opens the way for the network's founding community.

"After our recent graduation from Techstars' Web3 Accelerator, we are working towards revolutionizing the creative industry by demonopolizing the market to allow artists to fund their projects while making fans a direct owner of their artists' success. The NFT collection is a natural extension of our ongoing token sales, as it will allow us to identify and reward our early supporters as founding members of the Staxe community. ." – Luis Martinez, CEO of Staxe.

The NFT Collection features a Profile Picture(pfp)-style animated generative artwork designed by collab artist [TEM](#) (aka The Kid), which owners can customize with custom music tracks. Token ownership will identify the founding community of Staxe, with unique utilities ranging from IRL and event access to token exclusives and whitelist right for the project's upcoming token sale [STXE](#).

The Staxe project has deservedly generated a lot of buzzes, with €500k pre-seed raised from Techstars and Angel Investors. It also won the R&D blockchain grants: Blockchers.eu, Blockpool.eu, and Ministry of Culture Spain, amidst several accolades from notable names in the creative industry and crypto space. Staxe enables music and creatives' economies on Web3 by coordinating and structuring music and creative assets in tokens, which are subsequently sold as NFTs to fans in exchange for a share of the earnings or royalties this produce.
