

Tarp Manufacturer Releases Guide For Restoring Storm Damaged Roofs

Tarps Now® Releases Information focused on protection of damaged structures

The logo for Tarps Now features the word "TARPS" in a large, bold, dark blue sans-serif font. Below it, the word "NOW" is written in a red, rounded, sans-serif font, with a registered trademark symbol (®) to its upper right.

Benton Harbor, Michigan Sep 3, 2022 ([IssueWire.com](https://www.IssueWire.com)) - With **Atlantic Hurricane Season** underway, this year has been the exception, with nary a single major tropical storm reported during August. Based on the trends associated with climate change, it's highly likely that major storms are in the offing throughout the balance of the year. This provides consumers a unique window to prepare by having supplies of tarps to quickly cover gaping holes in roof structures often caused by violent storm activity on the **Eastern Seaboard** and the **Gulf of Mexico**, as well as multiple protectorate island nations, such as **Puerto Rico** and the **Virgin Islands**.

To meet that need, U.S.-based industrial tarps and covering producer **Tarps Now®** has published an informative guide to help consumers select the [Best Roof Tarps](#) to protect and restore structures damaged in the wake of storm activity where tornados, high winds, flooding, and tidal surges cause serious levels of storm damages upon homes, businesses, and public service concerns.

To address these issues, the highest-demand items sought in the wake of such storm activity are the use of industrial-grade roofing tarps to protect valuable possessions, as well as critical inventories and

supplies needed to ensure a more rapid recovery.

Other frequent needs include the need for [heavy-duty tarps](#), [mesh tarps](#), fire retardant tarps, tarps, industrial tarps, [canvas tarps](#), tarps, poly tarps, [custom tarps](#), vinyl tarps, and water draining diverter tarps to better facilitate clean-ups and reduction of flood damages, as well as rugged clear vinyl and screen mesh materials used to cover windows, capture fresh rain waters, and provide shade for the care and protection of pets and livestock in the aftermath of a major hurricane or storm. A list of such materials follows.
