

## Varicose Veins Medical Treatment Clinic

One of the leading varicose vein surgeons in the country. An expert on what causes signs of venous hypertension and how to treat it. Also develops new techniques for vein removal as part of his practice at the Center.

**Mira Bhayandar, Maharashtra Oct 1, 2022 ([Issuewire.com](http://Issuewire.com))** - An endovascular [varicose veins specialist](#) who offers his patients minimally invasive surgical treatment for varicose veins (varicose). Varicose veins are the result of extensive blood circulation problems within the muscles, tendons, and skin. It is a common condition mainly affecting women and older men, which is characterized by swollen,

bulging veins that often appear blue in color. There are also other symptoms such as leg pain, tingling sensations, discomfort, or even itchiness when using your legs or lower extremity.

An international board-certified surgeon who specializes in the non-surgical varicose veins medical treatment. He performs all types of vein procedures including varicose vein surgery and stripping, spider leg vein surgery, leg ulcer management, and laser therapy for chronic venous insufficiency (CVI).

He uses a high level of systematic diagnosis before embarking on a precise treatment plan that takes into account the patient's age, gender, medical history, and symptoms. When necessary he uses innovative techniques such as the use of intravascular ultrasound to locate the vein (for stripping or laser surgery).

Varicose veins can be caused by long-standing pressure due to an increased weight on the leg due to genetics or pregnancy weight gain. This can also lead to swelling of lymph vessels which causes damage and inflammation within the tissue surrounding the vein which eventually gives birth to varicose veins.

An expert in surgery, both male and female; a highly experienced cosmetic surgeon employing the latest technological advances. He is an experienced surgeon, and his commitment to providing his patients with new and innovative treatments, and advancements in minimally invasive procedures, has helped him achieve excellent results.

He has been practicing as a Vascular Surgeon for a long time. He specializes in the treatment of "Varicose Veins". He also specializes in treating "Vascular Conditions" and "Interventional/Endovascular Surgery". His experience with varicose veins surgery has made him one of the few surgeons worldwide who perform this surgery. He offers "Minimal Invasive Surgery™ Treatment" that combines innovative techniques and procedures with new equipment to minimize risk to his patients.

His unique philosophy and beliefs are a big part of his success in life. This is why he practices the best, most effective, and most natural treatment for varicose veins.

He aims to render the highest quality of health care services based on his deep understanding of human beings, their problems, needs, their weaknesses, and strengths, as well as great respect for the human body and its innate intelligence.
