**Greater Accra, Ghana Oct 3, 2022 ([IssueWire.com](https://www.issuewire.com))** - Under the name MHM Health Consultancy Ltd, Dr. Michaelene Holder-March established the Leaders in Health and Tech Conference and Exhibition. According to Dr. Holder-March, a gap must be bridged between adequately funded international health systems and under-resourced healthcare models.

At Leaders in Health and Tech Hybrid Conference 2022, a review of health technology, knowledge, clinical trials, accessibility, point of care, and quality of treatment is needed to assist in rethinking the current healthcare delivery system in Africa. CIOs and senior executives, IT experts, healthcare professionals, innovators, students, researchers, and market suppliers, are among the attendees. This groundbreaking hybrid conference features well-chosen clinical presentations that will cover case studies, and highlight successful strategies by healthcare providers.

There are 4 panels on levelling up health, medical tourism, and how the digital revolution may affect the future provision of healthcare services. This is such a great opportunity to be a sponsor and have a platform to promote your business across Africa and beyond.

Thanks to a fantastic team, based in Ghana this is all possible: Professor Rotimi Jaiyesimi, Dr. Emma Oliveira, Dr. Lawrence Koomson, Abena Anawaka, Godfrey Ceylon, Tommie Darku, Henry Badger, Sadiq More, and Meldrick Cofie.
