

Upcoming Drama Indie-Short On 'Abandoning Old Age Parents': Riyansh

What needs to be introduced, is social issues and this needs to be drawn the attention of youths not just in India but around the world through cinema.

Ghaziabad, Uttar Pradesh Oct 6, 2022 (Issuewire.com) - All set to bring another Indie-short on the floor, In his next upcoming short film that's based on the concept of **'Abandoning old age parents'** and **'Importance of parents'**, Riyansh is all set with this independent short where he is majorly focusing on less appreciation of parents for their sacrifices as well as the criticism they've to face at many points or circumstances by their children.

In a recent interview, Riyansh stated that *“the cases of abandoning old age parents are inflating and not being treated well by their children, they're just being abandoned like a ‘sack of nothing’ which is spreading like a pandemic around the world that's very inappropriate.”* Perhaps, the data on **Google** reveals that just in India, there are **18 million** senior citizens who are homeless and have nowhere to go or stay where majorly, of the cases are related to the abandonment of old age parents which is a horrible condition.

“It is a condition which leads on through an insect-like psyche of youths from the teenage only for not being grateful for what their parents have done for them, teenagers do compare their parents’ worth as well as financial condition to other parents which left a comparing ungrateful insect in their psyche and grow gradually with the time and ends uabandoning their parents”, said Riyansh.

He teamed up with some international veteran artists in this short film I.e. ‘Invoice Of Father’ where **Sidney Chun** came as an ‘Executive Producer’ of the film, **David Martinez** as the ‘Creative Director’ and **Varun Gowth** as the ‘BGM Artist’ in fact, they loved and appreciate the concept which is based on such important concern which is needed to be in the frontline. Riyansh has more plans to introduce more mind-bending concepts which eradicate superstitious beliefs and help to address mental health subjects.
