

Xgimi Leads The Android Powered Projector Market With Innovative Smart Designs

From its portable projectors to its laser tv, XGIMI projectors have received glowing ratings from the Android media

Sunnyvale, California Oct 15, 2022 ([Issuewire.com](https://www.issuewire.com)) - XGIMI Limited, the leading projector, and laser TV manufacturer that has been highly praised by the product design and A/V industry announces its commitment to being the best Android-powered projector manufacturer. XGIMI's seamless integration of Android TV into their sleek, smart projectors has made them fan favorites and received praise from established Android media around the world. XGIMI's commitment to ease of use and a focus on user experience has helped redefine what projectors are capable of. XGIMI's innovative, Android-powered designs have garnered the attention and praise of the Android community around the world, establishing XGIMI as the market leader in Android-powered projectors.

XGIMI's goal is to create products that seamlessly blend into home spaces and are supremely easy to use. To that end, XGIMI has integrated full Android TV into all of its projectors. Android TV means users can sync their content across all of their devices so they never miss the latest episodes and have access to thousands of apps like Disney+, Amazon Prime Video, HBO Max, and more at their fingertips. XGIMI projectors are as easy as using your smartphone, users can log in, point to the projector and play content instantly. XGIMI's autofocus + auto keystone features, and ISA technology, which instantly finds the perfect screen size, have made home projection a breeze. These features have caught the attention of the Android media, who have consistently praised XGIMI projectors as some of the best Android-powered projectors on the market.

Android Central gave Recommended badges to XGIMI's smart [Horizon Pro](#), [Elfin](#), [Aura](#), and [Halo+](#), while Android Headlines named the home-theater-in-a-box [Horizon Pro the Best Android Powered Projector You Can Buy](#) and dished out its Editor's Choice award. Android Police named both [Halo+ and Aura](#) as Best Android Projectors, saying "It's safe to say that the Halo+ is the best portable projector around." [CNET said of the portable Halo+](#) "the simplicity of the built-in Android TV interface and its myriad streaming options makes it far easier to use than many previous portable projectors we've liked." Android Central also named [XGIMI's smallest MoGo Pro](#) to their list of Best Android Powered Projectors.

XGIMI is committed to elevating home projection and staying the Best Android Powered Projector manufacturer and will continue to adapt the latest version of Android TV to ensure that users will always have the best experience."When developing our products, we always focus on the user and reimagine what is possible with home entertainment. Our goal is to offer each customer a simple and comfortable viewing experience. The integration of Android TV laid the foundation for smooth cinematic moments," said Tex Yang, VP of Global Business.
