New York City, New York Nov 24, 2022 ([IssueWire.com](https://www.IssueWire.com)) - [Mission 1 \(M01\) token](#) is a project that aims to form a network of crypto investors to coordinate actions and investments while also having a significant impact on the digital asset industry.

The goal of making cryptocurrency with values as low as a few thousandths of a dollar attain the initial objective—the valuation of at least one dollar—served as the motivation for the M01 denomination.

Additionally, this recently launched project aims to create a community of cryptocurrency investors who adhere to the "buy the dip and sell the pump" saying. This community will work cooperatively to find the best crypto gems on the market, plan massive action to improve their performance, and profit from the outcome. M01 is also a community-driven initiative that, starting with phase three of its plan, will be run by a decentralized autonomous organization (DAO).

All interested traders, whether new or experienced, can join this ground-breaking strategy's network of like-minded people who are striving for the same objective.

The M01 Token, which is a deflationary token with a fixed supply of 1 quadrillion, is built on the Binance smart chain network and will be issued according to the following metrics:

50%—Private Sale | Multiple Rounds

25%—Exchange Pool | CEX Marketing Packages

15%—Locked for 2 years in Pink Sale

5%—Farm & Pool

3%—Airdrops | Share to Earn | Marketing

2%—IT & Founders

Moreover, M01 **ensures all holders share a total of 5% of tokens levied on each transaction**, making it a worthwhile token to hold and watch increase dramatically in one's wallet. There is also a 2% automated token burn anytime a transaction occurs, ensuring a steady reduction of the circulating supply. Finally, there is a 3% buyback tax that is equally applied to each transaction to keep steady supplies in the wallet allocated to price management.

A **PRIVATE SALE** of Mission 1's token (M01) is now taking place on [Pinksale](#). With this, users are able to acquire 10 billion \$M01 tokens along with priority rights for recurrent \$M01 airdrops in the near future for just 0.1 BNB (less than \$30 at this time).

M01 will distribute the funds raised as liquidity to both [MelegaSwap](#) and PancakeSwap, where smooth trading will be taking place, right after the private sale—which is set to conclude in mid-December 2022.
