Bellingham, Washington Nov 20, 2022 ([IssueWire.com](https://www.issuewire.com)) - *Raising a happy, healthy pet can be difficult and time-consuming, but YepiPet, the smartest pet care app on the market, makes it a whole lot easier. In its newest version, the mobile pet management solution added more improvements and new features which include “Pet Sharing”: a great, easy way to manage a pet profile with one’s friends, family, caretakers, and many more. The newest version of “YepiPet” was recently released on the Apple Store and Google Play Store.*

YepiPet is now equipped with many helpful features that allow pet owners to stay on top of their pets’ care, health, and growth. Additionally, YepiPet increases the owner's knowledge of and access to affordable, quality pet products and helps them keep track of all important care activities and information relating to their pet. Having listened to its user feedback after its recent announcement, YepiPet is now back with even more features for its users. New features available are designed for inclusiveness and practicality. Now, YepiPet announces its **Pet Sharing Functionality** specifically curated for pet owners.

Shared pet profiles.

It is now possible to share your pet’s information with friends, family, and other caretakers.

Pet owners can now share their pet’s health information, vaccination, and medical records in YepiPet. This is not only a great feature to share one's pet information with every member of their family, but it can also be useful to easily share relevant data with a vet, pet sitter, or groomer.

To share a pet, it’s really easy:

- **Go to YepiPet**
- **Add new Contacts** with an e-mail
- **Click the ‘Share’ icon** next to the contact. The contact will receive an invitation email with easy-to-follow steps.

After logging into YepiPet, the contact will see a new pet card on their dashboard. By tapping “yes” in the “Accept Invitation” field, the pet is automatically added to the user’s dashboard.

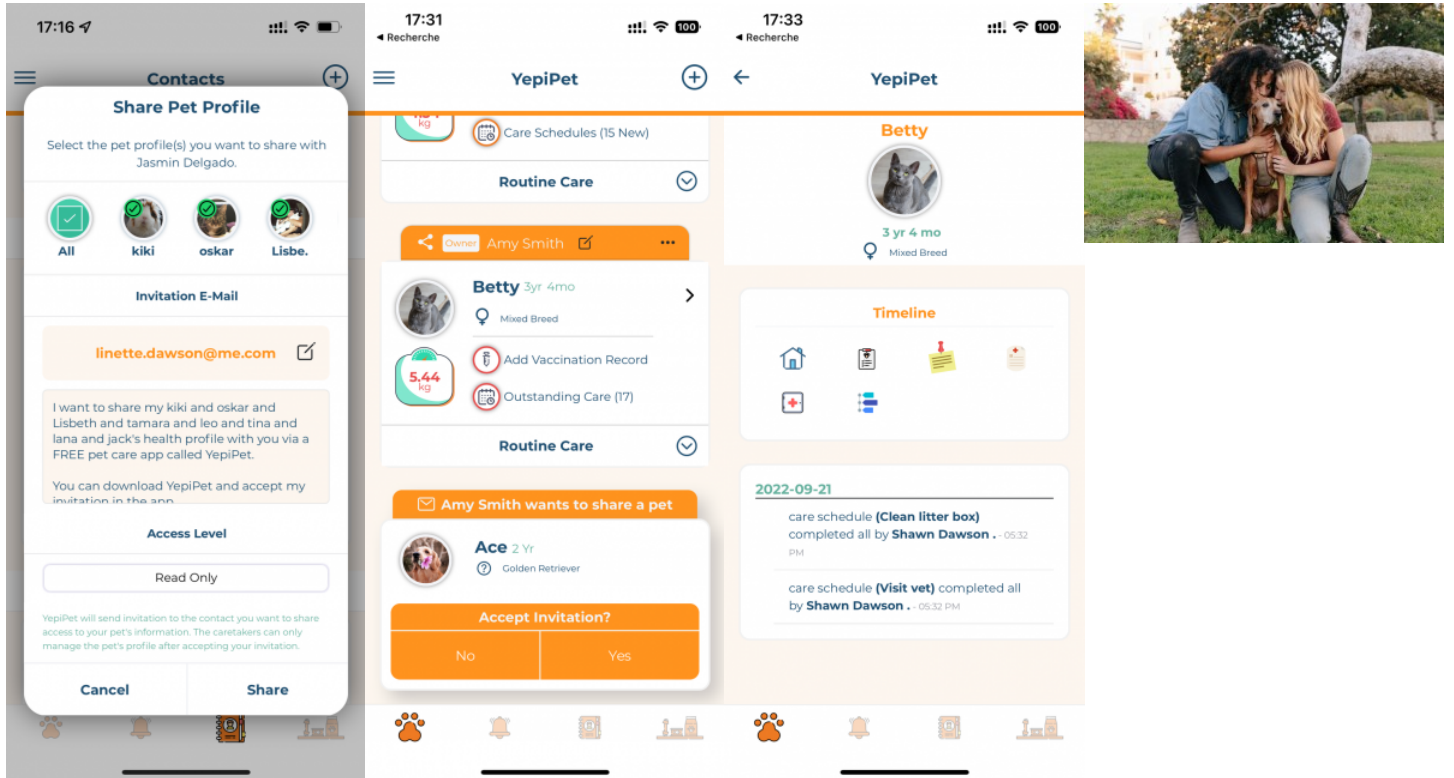

For easy orientation, the orange bar above the pet card helps identify shared pets and their owners.

Every shared pet profile has a button called “Timeline”. In this section, every activity performed by the collaborator is listed – this way, it’s really easy for owners to keep track of all the activities related to their shared pet profile.

About BiiGreen LLC and YepiPet

YepiPet’s work is inspired by their genuine love and care for their cats and dogs at home and in their

community. YepiPet is the ultimate smart pet parenting app for furry friends. Pet owners and pet care professionals will have the opportunity to work together on the best way to love and care for these animals. Keeping their vaccination updated, completing pet chores, and finding information about their pets has never been this convenient.
