

# Scholars International Conference on PHYSICS AND QUANTUM PHYSICS

Physics Conference 2023

2nd International Conference on

## Physics and Quantum Physics

27-28 March 2023 | London, UK

**Newcastle upon Tyne, England Nov 9, 2022 ([IssueWire.com](http://IssueWire.com))** - After a Great Success of the First Edition Physics Conference 2022 held during June 22-23, 2022 in Berlin, Scholars Conferences proudly announced its “2nd Edition Scholars International Conference on Physics and Quantum Physics” on March 27-28, 2023 in London, UK with the theme of “Recent Research Methodologies and Discoveries at Physics and Quantum Physics”.

Physics Conference 2023 has an overall goal of connecting scientists, academicians, and young researchers, to discuss and share knowledge in the emerging field of Physics and Quantum Physics. As we are very much attentive to the importance of Physics and Quantum Physics, Scientific sessions are designed in such a way that each attendee will be able to learn things at the finest in the meeting. Novel innovations and presentations will help to establish a basic knowledge among all the representatives.

Along with sharing and gaining information, congress also affords space for communications where everyone will be given the freedom to interact and helps in making new international collaborations. The summit will also provide a great chance for delegates and people from the industry to make new contacts where they can develop their products.
