WOWzer offers accountants and bookkeepers a new automation tool

Automation specialists WOWzer Technologies joins the Xero App Store to automate the backup and restore of data for accountants and bookkeepers.

Vancouver, British Columbia Nov 1, 2022 (Issuewire.com**)** - WOWzer Technologies Inc. is focused on automation and security for accountants and bookkeepers. It was founded by 20+ year CPA Vince Schembri, who experienced a catastrophic data failure in 2014. Vowing to never have this experience again or let it happen to other accountants and bookkeepers, he and his co-founder Mark Kennedy, built a backup and restoration automation application for accountants and bookkeepers.

Many accountants and bookkeepers are so busy doing their job that they may occasionally miss

backing up their customers' data. WOWzer's backup and restore app automates this necessary task so there's more time to prioritize higher-value tasks.

Have you ever wished you could roll back the clock on a file? Perhaps your customer was doing some work and accidentally deleted a few things, or you connected an app and then changed your mind. No problem, you can restore it to yesterday or even last month.

As more and more accountants and bookkeepers become aware of the shared responsibility model, backing up and being able to restore data becomes more important. Cloud platform providers, accountants, bookkeepers, and the end customer all share the responsibility to keep the data safe and work together to ensure records are kept intact. WOWzer makes it easy and automatic.

"WOWzer Tech's Backup and Restore is amazing. It is simple to use, easy to compare old values with new values, and when I did a backup and restore it all looked the same."
Erika Dowell – CEO Signal Operations

WOWzer Backup and Restore launched on the [Xero App Store](#) as a certified Xero app partner on September 15, 2022, making a fully auditable Xero backup and restoration application available to accountants and bookkeepers. With three3 repositories of data, including a disconnected cyber vault, customer data can be restored without hiring a technician or being locked out for weeks.

WOWzer Technologies Inc. is on a mission to automate the tedious, time-consuming, and expensive tasks associated with accounting and bookkeeping. Made for accountants and bookkeepers by accountants, we know the pain points and are passionately building automation tools to overcome them.
