

Renovated Mayfair Hotel Features Expansive Mosaic Artwork

Mozaico's Handcrafted Mosaic Adds New Centrepiece To Hotel Lobby

Florida City, Florida Dec 16, 2022 ([IssueWire.com](https://www.issuewire.com)) - Mozaico has recently completed a dazzling custom mosaic artwork for the iconic Mayfair Hotel at Coconut Grove, Miami, Florida, spanning an expansive six-foot diameter. Working closely with architects and contractors, [Mozaico](https://www.mozaico.com)'s design transmits a revitalizing sense of movement and dimension in a handcrafted mosaic medallion embellishing the newly renovated hotel lobby. With the recent reopening of the Mayfair Hotel following the completion of a major renovation project, rebranded as the Mayfair House Hotel & Garden, guests

are already able to enjoy Mozaico's latest artwork.

Mozaico's skilled craftsmen spent more than 16 weeks hand-setting every stone in the custom mosaic that has been inspired by and designed specifically for its new home. Assembled using over 30,000 hand-cut, hand-set tesserae, the mosaic medallion's deceptively minimalist design, and the color palette is comprised of an extensive range of hues. At first sight, the mosaic design appears to feature block colors, but on closer inspection, there are many different shades of marble at play. The circular motion of the medallion is further reflected in the unique flowing effect achieved by careful stone placement. Pieces of cut marble were added one by one using tweezers or fingers to map out the linework in the early stage of bringing the mosaic to life.

It was essential for Mozaico to ensure that the color of every stone exactly matched the design. Mozaico's team searched far and wide for the highest quality marble in perfectly matching colors to ensure the mosaic artwork can withstand the test of time and the elements, and remain intact for decades to come. It was also essential for all stone colors to work perfectly in combination with one another to create a sense of depth, shade, and movement.

Eight Mozaico's craftsmen worked tirelessly to assemble this monumental mosaic. In order to photograph the final artwork, Mozaico's team had to place it on a football field due to its impressive scale. The rendering and design of the mosaic were created in close collaboration with interior designers responsible for the Mayfair renovation project. These skilled craftsmen took the highest level of precision from Mozaico's team to ensure the artwork fits the design seamlessly.

Located at 3000 Florida Avenue, just a few miles from the historical Vizcaya Museum & Gardens, the iconic Mayfair Hotel was built in 1985 and designed by architect Kenneth Treister. The hotel's renovation project builds on its original design principles and will prominently feature art throughout its interiors to provide guests with the experience of a secluded oasis escape.

Notes to the Editors:

Founded in 2003, Mozaico is a luxury art and craft brand bringing mosaics into home interiors worldwide. Headquartered in Naperville, Illinois, Mozaico collaborates with skilled artisans in Lebanon to produce mosaics using traditional techniques passed down through generations and premium materials, such as marble. Mozaico's mission is to shift the perception of mosaics and introduce this design form into contemporary spaces.
