New Utility token for the peer to peer space

Road Town, Tortola Jan 30, 2023 (Issuewire.com**)** - Swiftco. Swift meaning fast and Co short for company, is a new cryptocurrency utility token. Set for the future, Swiftco looks to power an ecosystem within the peer-to-peer space with companies such as Sharetheload is looking to implement in the near term.

Utility tokens is a crypto tokens serving some purpose within an ecosystem. In a such use case, Swiftco will allow users to perform buy, sell and earn fiat currency across its network. This utility token will be unique to the ecosystem within the group.

The vision of the founder is to promote a sustainable and environmentally future where people help one another across the world with its services and earn. In saying that, Swiftco has been added with Sharetheload to add an additional layer of trust and security within its ecosystem

As a new industry entrant, Swiftco wants to earn a reputation in the global market and grow a global harmonious community.

Swiftco in partnership with Sharetheload Limited, can be bought via www.sharetheload.com or www.swiftco.io with a maximum amount of tokens accumulated by users at 1 million tokens out of a fixed supply of 17 billion. This ensures fairness and equality amongst the global population. The whitepaper can be accessed at https://swiftco-v2.gitbook.io/swiftco-whitepaper/

Swiftco is expected to launch from its website or via Sharetheload's on 6th February 2023
