

Septillion (SPT) the first presale NFT announcement

NFT and Project prediction

Singapore, Singapore Jan 14, 2023 ([IssueWire.com](https://www.issuewire.com)) - Septillion (SPT) is a decentralized BEP-20 token on Binance Smart Chain (www.septillion.io)

World's First Decentralized Marketplace With a Blockchain Infrastructure

What are the utilities of the SPT token?

- The Septillion Token (SPT) is the engine of the entire Septillion ecosystem, mediating trades within its platform.
- SPT offers holders rewards in the Septillion platform.
- SPT can be exchanged within the Septillion platform with other users to fuel the SPT economy.
- The SPT token can be used to purchase NFTs available in the marketplace, including unique ownership of Game-fi characters.
- The SPT currency can be traded on DeFi platforms and traded to USDT at any time.

Founded in Dec 2021 Septillion (SPT) is continuously raising the standards of cryptocurrency in Indian Market.

Focussing on the road map Septillion is having a total supply of 35,00,000,00 SPT Tokens out of which 21% of the supply has been locked for a period of 2 years under Yield Farming with an annual APY Of 20% for the investors.

Septillion has announced the presale of the NFT starting from Jan 20, 2023, based on the P2E Gaming which will bring huge growth and profits for the traders and investors as per the crypto industry survey.

Septillion Price Predictions for 90 days:

The token was listed on LAToken in the month of Aug 2022 @ 1.50\$ and after 72 hours of the listing, the All Time High (ATH) was noted 2.31\$ which shows a spike in growth during the initial campaign of trading under high sell pressure and the historical data for next three months was parallely running @ 0.11\$ to 0.03\$ indexed a huge downfall and the sudden dip.

Again the token was listed on the Coin store in the month of December 2022 @0.12\$ and within 24 hours of listing the price indexed a large spike @3\$ and again the dip was really unexpected falling down to three cents with a satisfactory trade volume of more than 10m+ \$.

What The Data Says:

It's a very known fact that crypto runs under bearish and Bullish Market conditions.

The survey from the top crypto experts says that after a large roadmap of a year, the token has survived in this bearish market with a huge user database of more than 4k+ real users going to participate in the NFT across the globe and the according to the Tokenomics the supply in the market will be 48% as 21% tokens are locked for two years for the users which will provide a very high yield on the unlocking date. The experts noticed the demand for the token under more than 10k+ watchlists in different ranking sites and the token is still waiting for the presence on the Coinmarket cap which itself brings a very huge database of users into the platform.

The token has indulged its three different projects in a consecutive manner which is a great opportunity for the users to back and roll. NFT/The ARC Technology/Septoverse Battlemania-P2E are the projects implemented in every 90 days that certainly build a great ecosystem for septillion Tokens.

An eagle eye under the survey indicates a minimum growth rate of a 10,000% hike in the price and can

go up to a remarkable hit of 103\$ in the month of February 2023 and March 2023 will be a very golden time for investors and traders under the Septillion roof.

Undoubtedly it can be said that The CEO of the company Mr. Neeraj Kumar Jha has created a logical ecosystem for a healthy upliftment of the Septillion Token Market.

According to the crypto prediction, a safe trade can be noticed and the right time for trade as the token is smoothly moving towards the Bullish market.
