

HIPEAK Launched Two 750W 48V 15Ah Folding Electric Bicycles - Bona and Elias

Light and Strong!

Fortuna, California Feb 23, 2023 ([IssueWire.com](https://www.IssueWire.com)) - We are glad to introduce to you the greatest masterpiece of engineering, technology, and design - HIPEAK Bona and Elias fat tire [folding electric bike](#). I'm going to share the details of the products with you.

Design Concept

As a user-oriented company, [HIPEAK BIKE](#) hopes that this folding electric bicycle can not only improve people's travel efficiency, but also meet the personalized travel needs of urban people today, and practice the concept of low-carbon and environmentally friendly travel.

Brand Background

HIPEAK is here to help you make daily challenges easier, unlock opportunities, and to bring elusive ambitions within reach. We will never sacrifice performance for price, function for form, substance for style, safety for speed, or quality for affordability.

HIPEAK has its own factories in China which have more than 15 years of experience in the e-bike

industry. They also own a warehouse in the US.

Feature

They own the same configuration but different designs——BONA adopts a Step-Over design, a good choice for taller users, while ELIAS adopts a Step-Thru design, which is very suitable for someone relatively petite. The biggest feature of the two bikes is that they are convenient and comfortable to ride. Its battery can cover an average commuting range of 50-60 miles. The fat tires are built to take on all kinds of terrain. If you are not riding, it can be quickly folded.

Max Load: 350 lbs

Tires  20" x 4" fat tires for all terrains

Lights: LED front and rear lights with brake tail lights

Additional features  E-bike fenders and rear rack

Folding Design

The Bona and Elias are easy-to-fold commuter e-bikes that fold in the middle of the frame. They are easy to carry because of less weight than most other folding e-bikes. Unboxing and assembling the bike takes about 30 minutes. After a few uses, you'll be able to unroll and start riding in seconds. and there's even an extra level of fastening to make sure it doesn't snap open.

750W Motor

HiPEAK Bona & Elias folding e-bikes are equipped with a 750W brushless motor. This powerful motor could help you climb more easily and ride faster. 750-Watt electric bikes can give you great speed combined with smooth control. The top speed is up to 25MPH.

48V 15Ah Battery

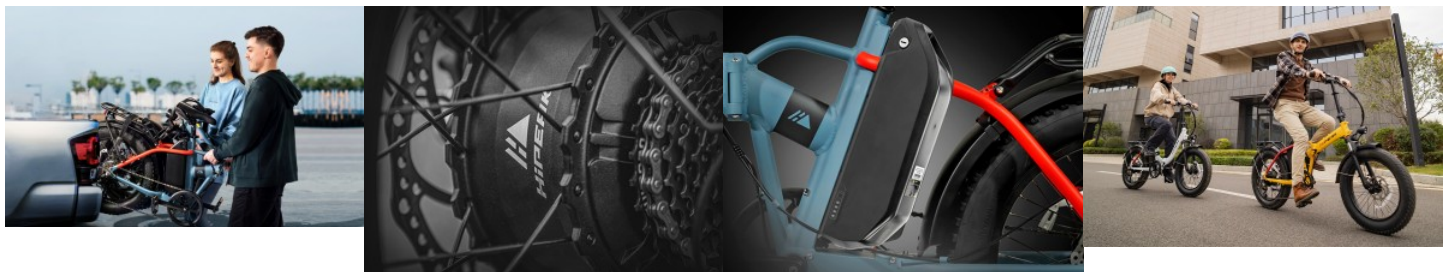

Unlike most folding e-bikes from other brands, which are using 48V 12-14Ah batteries, HiPEAK is equipped with a 48V 15Ah Lithium-ion battery. The higher power of the battery brings this e-bike a longer range. Both HiPEAK e-bikes are able to cover a range of up to 50-60 miles per charge with the 7-level pedal assist.

20" * 4" Fat Tires

[Fat tire e-bikes](#) make our riding more comfortable and easy on all terrains. With a fat tire e-bike, lack of performance due to weather is not going to be an issue for you anymore.

HIPEAK BIKE is an electric bicycle company that manufactures innovative, high-performance, valuable, and [affordable electric bicycles](#) and outdoor accessories. We will strive to create more environmentally friendly electrical products to provide you with a green life.
