

USAII™ Announces its Annual International Scholarship Exam 2023 to Award 100% CAIE™ Scholarship for Students

USAII announces 100% scholarships worth up to half a million USD for students qualifying in International Scholarship Exam (ISE) 2023. ISE 2023 starts from March 25, 2023.

The advertisement features a background image of a young woman with curly hair smiling while looking at a laptop. On the left, the USAII logo is displayed with the text 'UNITED STATES ARTIFICIAL INTELLIGENCE INSTITUTE'. Below the logo, the headline reads 'YOUR GAME-CHANGING AI CAREER AWAITS YOU'. Further down, a yellow call-to-action box says 'JOIN INTERNATIONAL SCHOLARSHIP EXAM AND WIN 100% SCHOLARSHIP FOR AI CERTIFICATION!'. In the center, there is a blue shield-shaped logo for 'CAIE™ Certified Artificial Intelligence Engineer'. On the right side, an orange box says 'ACCEPTING APPLICATIONS FOR STUDENTS ONLY', and a yellow box below it says 'APPLY NOW'.

Stamford, Connecticut Feb 11, 2023 ([Issuewire.com](https://www.issuewire.com)) - The United States Artificial Intelligence Institute (USAIITM), the world's leading Artificial Intelligence (AI) certifications provider, has announced its much-awaited annual scholarships for university and college students all across the globe. This **100 percent scholarship** is for USAII's prestigious AI certification program – **Certified Artificial Intelligence Engineer (CAIE™)**. To avail of the scholarship the students must undergo [International Scholarship Exam \(ISE\) 2023](#) conducted by USAIITM in a 9-Day exam schedule starting from **March 25, 2023, to April 02, 2023**.

Recent reports from various organizations such as Technavio suggest that the global market size of Artificial Intelligence will grow at a CAGR of 22.26% between 2022 and 2027, thus forecasted to increase by USD 125.3 billion. The evolution of AI is still in process and new innovations in the domain such as the recent ChatGPT, Bard, etc. will only push the technology and its subsets to drive tremendous growth in terms of business, career, knowledge, and capabilities. More than 44% of businesses are planning to automate their processes or adopt AI in various forms, IBM says. This further gives way to better-skilled professionals in AI. Talent.com, a leading recruiting company has reported the average salary of an AI professional to be US \$140,000, which is way higher if compared to a traditional IT professional.

Having said this, it is also a known fact that according to IBM's Global AI Adoption Index 2022, one of the important barriers to AI adoption is the shortage of AI skills. The World Economic Forum categorically mentions that currently only 10% of the AI workforce is skilled and the irony is that around

97 million new jobs will be generated in AI by 2025.

To close the skills gap, according to USAII™, upskilling and reskilling the current workforce with industry-relevant AI skills is a very important step. USAII™ believes that it is also essential to start upskilling from the ground level, i.e. the students from universities and colleges worldwide.

USAII™ announces to the award of scholarships worth up to **USD 500,000** (half a million dollars) to students from universities and colleges worldwide. This scholarship will be fully paid (100% scholarship) and is exclusive to USAII's prestigious AI certification program – [Certified Artificial Intelligence Engineer \(CAIETM\)](#). Students from any discipline and who will be completing their Bachelor's or Master's in 2023 and 2024, can apply for ISE 2023. USAII™ says, if any student falls under the top 5 percentile in his/her region, he/she will get a chance to win the 100 percent scholarship on the program fee of CAIETM - maximum participation from any region could increase the chance of winning. USAII™ plans to conduct this International Scholarship Exam in a 9-day exam schedule starting from March 25, 2023, to April 02, 2023, in four (4) time slots globally. To get registered as a candidate for ISE 2023, students must pay a nominal fee and select the date and time for the examination.

“AI engineers have a turbo-charged future that will stay on for decades to come. Students must acquire an additional or complementary qualification that can enhance their relevance in the industry. We would love to see students globally upskill themselves and grab their dream job in AI and kickstart their AI careers. ISE 2023 will give students an opportunity worldwide to gain 100% scholarship to gain the most-relevant AI certification that will help them learn NLP, Python, Machine Learning, RL, GANs, etc.” – says Ajit k Jha, President, and CEO, EdTechDigit Innovations, the USAII's worldwide marketing partner.
