

## Ai training data development Initiatives announced by cogito

Cogito, a leading AI training data provider/data annotation and labeling company, aims to improve the quality of AI training data delivery to enterprises developing AI in health

**New York City, New York Apr 1, 2023 ([Issuewire.com](https://www.issuewire.com))** - In an effort to improve data delivery for AI models, Cogito has decided to invest more in staff training and software upgrades.

Cogito, a leading AI training data provider/data annotation and labeling company, is pleased to announce the launch of its new Quality in AI Training Data Delivery program. The program aims to improve the quality of its work delivery by investing more resources in data annotation and labeling. “The purpose of this investment is to ensure the highest quality products and services are delivered to our customers/clients,” the chief operating officer of the company revealed in a statement.

The program includes a dedicated team of data quality experts, access to the latest AI tools, and a comprehensive suite of services designed to empower AI in healthcare, automotive, banking, and various other sectors — with which customers will be able to train their AI applications with the highest-quality training data. The company strives to provide the most accurate and reliable training data possible and welcomes the opportunity to assist customers in developing powerful AI applications that meet their needs.

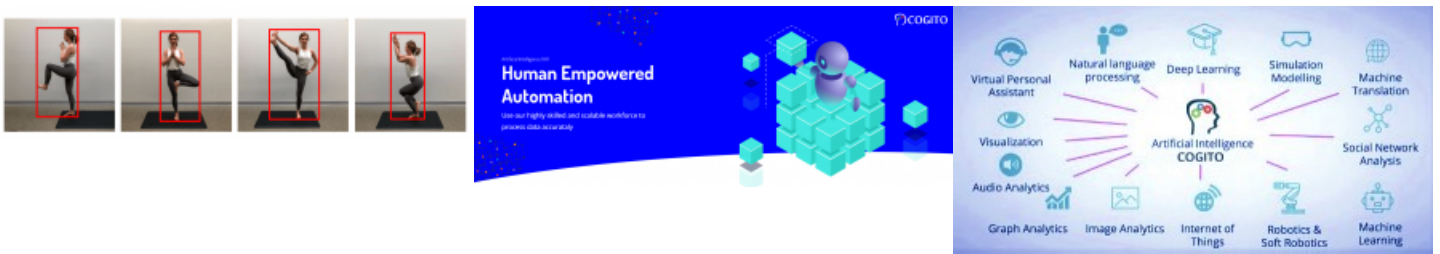

The investment in additional resources, as announced by the company, will be around

- A greater focus on training and development for staff
- Improved quality control systems
- Systemic feedback that is more comprehensive
- Automating processes as much as possible
- Enhancing existing software and equipment

“We are confident that these investments will help us to better serve our customers and provide them with the highest quality of work,” the company’s directors claimed so in a joint statement.
