He is also member of many scientific society, academies and associations like the European college of Pshychoneuropharmacology, associate of Rome foundation, European academy of tumour immunology etc. Beside, he is also an International peace ambassador of organisation like WAC, India.

Books and Works

Apart from his contributions to medicine, Dr. Omkar Prasad Baidya is also a highly regarded author. He has published books on universal ethics, world peace, and morality. His books explore a wide range of topics from morality and world peace to God's existence. Through his writing, he highlights the importance of human virtues in shaping lives and solving all human problems.

In his book "Morality Beyond the Human Brain: Scientific and Philosophical Exploration," Baidya introduces a new morality theory. He designed an equation for intrinsic morality, emphasizing that morality and immorality are essential for our existence on earth. According to Baidya, human extrinsic morality can be acquired through moral education, moral philosophy, and human values. In his other book on morality, Baidya introduces a new concept and theory of morality in all living cells. According to Baidya, this intrinsic morality is vital for the survival and existence of life on this planet and beyond. He proposes a mathematical model for intrinsic morality that nature has given all living creatures to help them overcome the struggle for existence. Omkar Prasad Baidya's books reflect his deep understanding of the human condition and desire to use his knowledge and skills to create a better world. He believes that world peace is a function of human morality and emphasizes the existence of God as a moral planner of the cosmic world

In "A Path to World Peace," Baidya highlights the vital role that human virtues play in shaping our lives. He shows that universal religion can be critical in establishing peace worldwide. Baidya argues that

human virtues such as compassion, forgiveness, and nonviolence can form three pillars of world peace. In his book “universal ethics and world peace”, he introduced a new concept of universal ethics and shown that how universal ethics can play an important role in the establishment of peace around the world. He has also shown role of human virtues in establishment of peace and how it can be solution to all human problems. He has also shown how respect towards mother nature is essential for existence of the species in this planet earth.

In his book, “ Nature and morality”, he has shown that mother nature has an intrinsic morality which plans all the fundamental laws such that they can promote stability of physical world. According to him, human morality has an huge impact on natures creation and existence of all biological lives in this planet earth and beyond. He also believes in the cosmic role of God as a moral planner of universe.
