Looking for a fountain with a beautiful lit-up display? Admiral Lake and Pond Restoration offers mesmerizing options that will also meet your aeration needs!

ADMIRAL

Lake and Pond Restoration

Ely, Minnesota Apr 1, 2023 ([IssueWire.com](https://www.issuewire.com)) - Admiral Lake and Pond Restoration is happy to help customers with the pond, beach or lake restoration. We design and build lake and pond products by hand in facility located in Minnesota. We are dedicated to providing the most flexible, practical and effective equipment and products to meet your needs, however specific those might be!

One of our most popular products are our lake and [pond fountains](#), specifically those coupled with a light set. A classic water display like a floating pond fountain can be taken to the next level with a light set, guaranteeing enjoyment both day and night. Beyond their aesthetic value, they will also simultaneously aerate your water, providing clarity and freshness to your pond or lake and aiding in reducing the presence of common maladies such as algae, "pond smell, and mosquitoes.

The Admiral Fountain is an energy efficient product, constructed with quality materials that provide maximum durability. Our stainless steel pumps feature a 3 Year Warranty, and our floats, nozzles, and hardware carry a full Lifetime Warranty. Our light sets also feature a 3 Year Warranty and feature a wide range of capabilities. Via the included remote, you can turn your light set on/off, easily select up to 7 unique colors. or control the functions (at up to 1000 feet!).

The unit also comes with a timer that can set the lights to turn on and off conventionally or via a photocell that will work via ambient light to turn on at sun-down and turn off at dawn.

At <https://admirallakeandpondrestoration.com/> one of our top priorities is to provide products with the highest degree of flexibility. We have many years of experience in lake and pond equipment designing, and we believe we have created some of the most convenient products on the market. The [Admiral Fountain](#) is no exception; we offer several customizable options for it that make it possible to use the fountain 24/7 and in a wide variety of ways that are completely unique to the industry. Want to water your lawn with your fountain? Just attach the converter hose attachment to your fountain. Looking to wash off your boat or dock? Check. Want to make an ice skating rink in the winter? It can be done!

Our lake fountains also offer convenience in that they come fully assembled and installation is a breeze! Simply attach a tether to the Admiral Fountain's included eye hook, and attach the other end to an anchor or point on your shoreline. Beyond this, the Admiral Fountain requires nearly zero maintenance. Simply keep it's filter clean and make sure it is stored in an above-freezing space, and you're set!
