Reisterstown, Maryland Apr 19, 2023 (Issuewire.com) - Clinical Associates, a leading provider of integrated medical care for over 50 years in Maryland, announces the availability of same-day and after-hours appointments at its Baltimore location. Ensuring patients receive timely, high-quality care even

during non-traditional hours, the expansion of appointment options contributes to an improved healthcare experience.

Clinical Associates' healthcare providers are available to address unexpected illnesses and manage ongoing health concerns. The decision to expand appointment availability came as a response to the growing need for more accessible healthcare services in the community. Recognizing that illnesses and injuries sometimes occur during standard business hours, Clinical Associates developed a strategy to provide a more convenient and patient-centric approach to medical care. By benefiting patients and helping to alleviate the burden on local emergency rooms and urgent care centers, the expanded appointment options contribute to a more efficient healthcare provider system.

In addition to same-day appointments, after-hours care is also available. After Hours Care Center hours are from 5:00 pm to 9:00 pm on weekdays and 9:00 am to 1:00 pm on Saturdays. The expanded service hours provide an accessible alternative to emergency rooms and urgent care centers for non-life-threatening conditions.

Clinical Associates' extended appointment options establish consistent care for patients. By offering same-day and after-hours care services, the medical team at Clinical Associates ensures that patients' medical records and treatment plans remain accessible and current. This seamless integration fosters improved communication among healthcare providers, enabling more informed decision-making in patients' healthcare needs.

A physician at Clinical Associates said, "Our goal at Clinical Associates is to provide the highest level of care to our patients, which means being available when they need us most. By offering same-day and after-hours appointments, we can accommodate our patients' busy schedules and provide timely, accessible care. We understand that health concerns don't always arise during standard business hours, and we're committed to being there for our patients whenever they need us."

Clinical Associates provides seamless, integrated care with various specialties, including [cardiology](#), [dermatology](#), [diabetes education](#), [endocrinology](#), [family practice](#), [gastroenterology](#), geriatrics, internal medicine, [optometry](#), [ophthalmology](#), and [podiatry](#). The team consists of over 40 physicians, specialists, and credentialed healthcare providers, supported by 175 trained support staff members.

To better serve their patients, Clinical Associates' offices also offer on-site laboratory centers for tests and blood work. This convenience minimizes the need for patients to travel to multiple locations for their healthcare needs and allows for faster results and treatment decisions.

Patients are encouraged to visit their primary care physician for routine care and non-life-threatening illnesses. However, if a primary care provider is unavailable or immediate medical attention is required, Clinical Associates' After Hours Care Center can assist. By offering same-day and after-hours appointments, Clinical Associates aims to make it easier for patients to prioritize their health and access preventive care services.

About Clinical Associates

About Clinical Associates: Clinical Associates is a premier provider of integrated medical care in Maryland, for over 50 years, offering a wide range of specialties and comprehensive healthcare services.
