

SavingTheWorld.us: Website Addressing Healthcare Industry and Manufacturing Loss Gains Traction, Offers Expert Solutions

"Newly Launched Healthcare Industry and Manufacturing Solution Website Gains Momentum with Over 500 Views and Counting"

Fort Myers, Florida May 1, 2023 ([IssueWire.com](https://www.issuewire.com)) - SavingTheWorld.us, a website dedicated to providing solutions to the healthcare industry and the loss of the manufacturing industry, has just surpassed the five-hundred views mark, with people's interest starting to peak. The site contains detailed information on the causes of both issues and common-sense solutions for fixing them, with expert analysts by an Economist, Tax lawyer, and Certified Public Accountant, and detailed cost reports of several acute hospitals.

As recommended by the website, several people have already contacted their congressional representatives and sent the information to the president, showing the urgent need for more people to take up the fight to fix the country.

The website's analysis highlights one of the major contributing factors to the loss of the manufacturing industry and the trillion-dollar trade deficit - the Healthcare Industry Oligopoly. The lack of competition, transparency, and law enforcement of consumer protection laws, illegal kickbacks for referring patients, and the flawed healthcare benefit payment system all contribute to the problem.

The article also reveals that the faulty tax system is another damaging cost to employers, imposing a tax before an item or service is provided, which is a tremendous cost, and then imposing a second tax on any profit a company may have.

The proposed solutions include higher taxes on the wealthy, public investment in infrastructure and education, and market-based solutions such as deregulation and tax cuts for businesses. Cost-containment measures, regulatory reforms, new technologies, and innovation are also suggested to improve efficiency without compromising the quality of care.

The analysis aims to address the impact of healthcare costs on American manufacturing competitiveness. By finding solutions that balance cost and quality, the US can address both the economy and healthcare costs, benefiting both employers and employees.

For a more in-depth understanding of how illegal activities are damaging the nation, the website recommends reading the illustrated article, "Fixing USA Economy and Healthcare."; the illustrated article **Fixing USA Economy and Healthcare** <https://acrobat.adobe.com/link/review?uri=urn:aaid:scds:US:320d88e0-3b13-3dee-ab8c-a0e53c91ed6e> **The article exposes the impact of high healthcare costs on businesses, particularly in the manufacturing industry, and offers practical solutions to reduce costs and improve competitiveness.**
