SIRE

ACT 0

THE DEBUT

San Sebastiano al Vesuvio, Campania May 2, 2023 ([IssueWire.com](https://www.IssueWire.com)) - Just a month ago, on March 7th, Sire released his debut single “Up Up Up” which was exclusively presented last year to Apple VP Lisa Jackson, and today, Sire, the rising music industry star, has just released his first single album “Act 0 (the Debut)”.

The album includes two songs, “Welcome” and “Zoom-Zoom”, which are characterized by a hard sound and united by their meaning.

The album declares Sire’s entrance into the music industry. “Welcome” is a song of celebration and anticipation, and is an introduction to Sire’s unique sound and style, with the artist describing himself as “the museum of future” or “an infinite show about Kings”, while “Zoom-Zoom” is a song of ambition and determination, an invitation to look closer, but without touching, Sire wants to show that he knows he’s always under the scrutiny of others, and he doesn’t mind it.

Sire has just started his journey to the top and nothing will stop him from reaching his throne. Already working on new music, Sire is exploring new genres and going for a full pop sound. His new music is set to be released this summer.
