**Ningbo, Zhejiang Apr 12, 2023 ([Issuewire.com](http://Issuewire.com))** - Yuyao Zeda Plastics Co., Ltd, a manufacturer of innovative plumbing products, has announced the launch of its new bottle trap for kitchen sinks. The bottle trap is designed to prevent clogs and backups in the kitchen sink by capturing large debris such as food scraps and hair.

### The Benefits of Installing a Bottle Trap in Your Kitchen Sink

Are you looking for an efficient and cost-effective solution to replace the traditional P-trap in your kitchen sink? Consider installing a bottle trap by Yuyao Zeda Plastics Co., Ltd! This innovative product provides homeowners with all the benefits of a P-trap, plus additional features like easy installation, less clogging, and improved hygiene. Here's what you need to know about this revolutionary product.

### What is a Bottle Trap?

A [bottle trap](#) is an alternative to the traditional P-trap used in plumbing systems since the early 1800s. It's designed as an "all-in-one" system that combines both a trap and a drain pipe into one unit, making

it easier to install and maintain than the standard P-trap. This type of trap is especially beneficial when you're replacing an existing system because there's no need to cut or alter any existing pipes—the bottle trap can be installed simply by connecting it to existing pipes. That makes it perfect for DIYers who don't want to deal with complicated plumbing projects.

What are the Benefits?

The primary [benefit of using a bottle trap](#) is that it eliminates clogging problems caused by food particles or other debris getting stuck in the traditional P-trap. Because it has no bends or curves, there are fewer places where food particles can get stuck and cause clogs. In addition, because there are no bends or curves, odors typically associated with plumbing traps won't be trapped inside—instead they will simply pass through without lingering in your home. Finally, because it requires fewer parts than a standard P-trap system, it can save you money on installation costs.

Products Details: ZDA140 Bottle Trap:

Introducing the ZDA140 Bottle Trap from Yuyao Zeda Plastics Co., Ltd! Whether you're a professional plumber or an at-home DIYer, this trap is an easy and effective solution for each and every sink.
