

Blue Sun Corporation Launches "CREW JUICE" Ready-To-Drink Hard Seltzer

San Francisco, California May 21, 2023 ([Issuewire.com](https://www.issuewire.com)) - Blue Sun Corporation, a leading provider of innovative beverage solutions, is thrilled to announce the launch of their latest creation: CREW JUICE. This revolutionary new Ready-To-Drink (RTD) Hard Seltzer combines the finest ingredients from around the world, including French Champagne, Mexican Tequila, Russian Vodka, and Club Soda, resulting in a delightful 5% alcoholic Hard Seltzer.

"We are excited to introduce CREW JUICE Hard Seltzer to the market," said Richard H. Davis, President and CEO of Blue Sun Corporation. "We believe that this new Hard Seltzer will be a game-changer, especially in the beverage industry."

The inspiration for CREW JUICE Hard Seltzer stems from the time-honored tradition among flight attendants, who mix-up various leftover beverages to make a truly unique in-flight cocktail to take-home. Recently, flight attendant Martha Stewardess shared in a recent interview in her 'Martha Stewardess Living at 34,000 Feet' online Magazine, that reports on the secret life of flight attendants. Stated that:

"Crew juice is one of the unintended perks of being a flight attendant, crew juice has no specific recipe - no two batches are ever alike, but they can usually get you buzzed pretty quick," she said.

Blue Sun Corporation's CREW JUICE seeks to capture the spirit of this aviation tradition and bring it to consumers worldwide. By blending high-quality ingredients, they have crafted a Hard Seltzer that delivers a refreshing and enjoyable experience.

The launch of CREW JUICE marks another milestone in Blue Sun Corporation's pursuit of innovative beverage solutions. The company aims to continue providing unique and enjoyable products that cater to evolving consumer preferences.
