

Elite Elevators Corporation is Revolutionising Stairlifts in Australia

Boasting a range of premium features such as seven safety layers, call device and medical equipment compatibility, the E50 stairlift from Elite Elevators Corporation is a must-have.

 Elite Elevators

E50

**7 Safety Layers
in Our Award-Winning Stairlift**

Melbourne, Victoria May 15, 2023 ([IssueWire.com](https://www.issuewire.com)) - Headquartered in Victoria, Elite Elevators Corporation is a leading distributor of home elevators and [stairlifts in Australia](#). The company has collaborated with TK Access Solutions, Germany to bring their world-class home mobility solutions to Australia. TK Access Solutions' home elevators and stairlifts have a reputation for being the most

energy-efficient, low-maintenance, and powerfully-built systems in the industry. They are manufactured at the specialist factory, TK Home Solutions Srl, in Pisa, Italy.

“Our stairlifts in Australia, the E50 specifically, have a range of applications. Elderly users, injured users, and disabled users can use the E50 to conveniently and safely access their homes. Outfitted with robust ASL technology, the E50 delivers a smooth ride and gives the user complete operative control. Offering Absolute customer satisfaction is one of our major goals. To this effect, our manufacturer-trained technicians, as well as our 24x7 customer satisfaction team, ensure that you get your queries and issues resolved in record time,” said a spokesperson for Elite Elevators Corporation.

The Advanced Swivel and Levelling (ASL) technology is a noteworthy contribution to the stairlift industry. ASL technology enables the E50 stairlift to perform several previously unwitnessed functions. It helps the E50 in facing away from the stairs, gliding along the staircase in one single motion. This is the complete opposite of conventional stairlifts that face the stairs and stop, stutter, adjust, and restart at each landing.

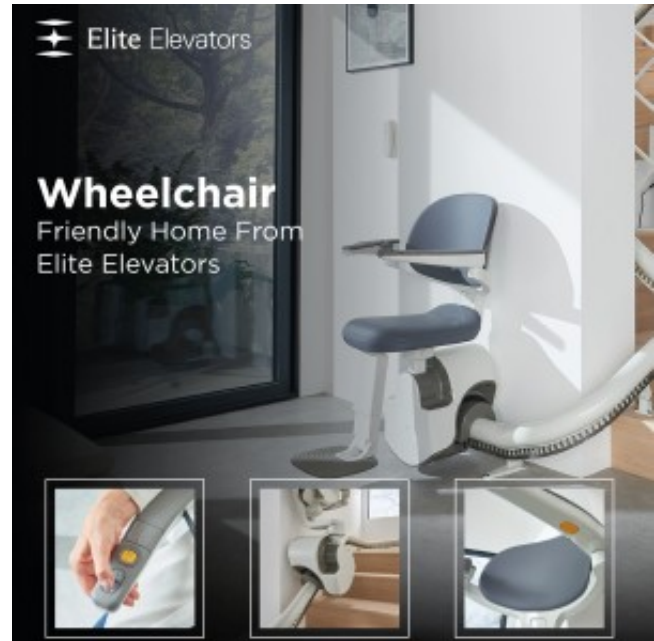

Also referred to as a chair lift, the E50 can fit onto any type of staircase - straight, curved, spiral, or half-turn. Elite Elevators Corporation’s chair lifts can also fit onto staircases as narrow as 610 mm. These chair lifts are manufactured in compliance with the European home safety codes machinery directive 2006/42/EC and EN 81-40. In addition to this, they are certified as safe by TUV SUD and SIL 3. These chair lifts are embedded with seven safety layers. These include a seatbelt, a call device, and an armrest detector among others.

A stairlift in Australia by Elite Elevators Corporation is a once-in-a-lifetime investment. A couple of its components can also be customised according to the users’ tastes and preferences. Based on this factor, the cost of a stairlift will alter accordingly. The cost of an E50 stairlift will be disclosed on request.
