**Kurukshetra, Haryana May 7, 2023 ([IssueWire.com](https://www.issuewire.com))** - Godrej Properties has recently bought a 62-acre land in Kurukshetra, India. This is an important move for the company as it looks to expand its presence in the region and build more projects that will benefit local communities. With this purchase, [Godrej Properties](https://www.godrej.com) now owns over 1 million square feet of land across Haryana, making them one of the largest real estate players in North India.

The acquisition of this 62-acre plot marks yet another milestone for Godrej Properties as they continue their journey towards becoming a leading developer with strong presence all throughout India. The new project is expected to bring immense value to both existing and potential customers by providing quality housing solutions at affordable prices along with retail options and other amenities such as schools, hospitals etc., which will help create employment opportunities for locals living around Kurukshetra area . Furthermore ,Godrej properties’s commitment towards sustainability initiatives like rainwater harvesting systems & solar energy utilization are also set to be implemented on site which makes it even more attractive from an environmental perspective .

Overall ,the addition of this new property into [Godrej Plots Kurukshetra](#) not only strengthens their position further but also adds great value proposition & convenience factor amongst buyers looking out for residential/commercial spaces within North Indian market . It would be interesting to see what kind of developments take place here once construction begins later down the line !
