

Luka Musich, DC, a Chiropractor with Musich Chiropractic Clinic

Get to know Chiropractor Dr. Luka Musich, who serves patients in California.

New York City, New York May 10, 2023 ([IssueWire.com](https://www.issuewire.com)) - Dr. Musich is a licensed chiropractor who works alongside his father, Dr. Charles Musich, at Musich Chiropractic Clinic with offices in Morgan Hill and Monterey, California.

Since 1986, Musich Chiropractic Clinic has been serving the health needs of South Silicon Valley residents. Doctors Charles & Luka Musich practice the Gonstead technique of chiropractic care for the entire family. For years, they have treated thousands of patients primarily in the cities of Morgan Hill, Gilroy, Hollister, San Martin, South San Jose, and Monterey.

With a large clientele, many of whom make regular visits to maintain optimum health and comfort, Dr. Musich is proud to offer advanced extremity care of the shoulders, elbows, wrists, hands, hips, knees, and feet. He also performs the Endo-Nasal Cranial Technique, an incredibly powerful treatment that realigns the bones of the skull, treating various head traumas and allowing for better breathing and brain function.

A graduate of Life Chiropractic College West, Dr. Musich took a special interest in extremity work after meeting Dr. Paul Walton, who introduced him to a new way of understanding joint motion and analysis. In an effort to learn everything there is about the extremities, to correct his father's shoulder and sister's wrist, he has spent hundreds of hours learning cutting-edge chiropractic extremities techniques.

Utilizing this knowledge, he has developed new techniques of his own to meet the needs of his patients. Always kind and personable, Dr. Musich will do what it takes to return a patient to health and enable them to do the things they love.

Chiropractic is a form of alternative medicine that mainly deals with the diagnosis and treatment of mechanical disorders of the musculoskeletal system, especially the spine. A chiropractor uses spinal adjustments, manipulation, and other techniques to manage patients' health concerns, including neck pain, back pain, headaches, vertigo, and a long list of other ailments and conditions. They aim to improve patients' functionality and quality of life by properly aligning the body's musculoskeletal structure and enabling the body to heal itself naturally, without the use of medication or surgery.
