

Moving Service Upgrades to BarCloud Warehouse Management System

Accurately Track Warehouse Inventory with Warehouse Inventory Management Software

New York City, New York May 8, 2023 (IssueWire.com) - Hawaii Moving Services of Honolulu upgraded its [warehouse inventory management](#) strategy with BarCloud's warehouse inventory management software. The moving company specializes in residential, commercial, and long-distance moving services. With their plans to expand operations into hotel renovation and warehousing, they needed an effective and efficient [barcode inventory system](#) for several reasons.

While scaling up their business, they realized that some of their clients require properly maintained inventory data for documentation. They also needed a system that would help optimize warehouse operations, especially with increasing amounts of inventory. Hawaii Moving Services found inventory management software to be the perfect solution for their needs.

The inventory tracking software helped them:

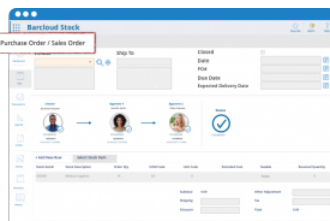

- Accurately track inventory in multiple locations
- Manage multiple vendors and warehouses
- Create and balance Purchase and Sales Order counts
- Communicate quickly and clearly with customers

After implementing the inventory system, they streamlined operations with complete visibility over inventory levels across multiple warehouses. They were able to smoothly expand their business and scale up operations while having complete control of software that grows with them. With accurate inventory data, they were able to provide customers with frequent updates, improving communications and satisfaction with their services.

The inventory tracking software also decreased manual tasks for their employees, with a simplified process of creating Purchase and Sales Orders. As the software also lets users manage vendor and customer information, their employees could instantly find and utilize the information they needed. This helped improve turnaround times and ensure accuracy as they process incoming and outgoing inventory when moving customer belongings and manage the materials needed for their renovation projects.

BarCloud is a market leader in [Inventory System and Asset Tracking Solutions](#) that uses Barcode technology with mobile Barcode, smartphones, and tablets. They help improve profitability by eliminating manual data entry, paper files, and forms and by automating record keeping. With their powerful system, businesses know 24/7 how and where Assets and Inventory are received, stored, used, and disposed of in the warehouse, field, and/or office. They have offices in California (headquarters), and Chicago.
