

Pablo T the painter of sensations and innovations by Art trends

The artist who changes the way we see abstract art

Tokyo, Japan May 11, 2023 (IssueWire.com) - Art Trends, the press office responsible for issuing press releases relating to the new trendy abstract painting, analyzes the new art of Master Pablo T

"Abstract art has a new skin, a new identity. An extrasensory form combined with the abstract form creates a new landscape for the soul to explore and discover. This new abstract painting is the culmination of elegant research, experimentation with the matter, the umpteenth proof of the artist's eclecticism. Through various artistic tools, such as plaster, volcanic powders, paints, and enamels, he reaches a state of liquidity and movement while sculpting the canvas, respecting a sacred message that springs from each work. The works, therefore, are precious art jewels which on the one hand demolish the rules of matter to rewrite them in a modern key and on the other hand describe landscapes of the soul which indicate in these works something that only enlightened minds can understand. able to grab. Pablo T's art makes the difference. His abstract art beyond the senses is the result of a completely experimental and innovative vision, the shapes, all of them, merge with the matter, with the thought, with the idea of abstract art of the highest level. The artistic monograph of the painter defined as the master of extrasensory abstract art by three Asian magazines is full of meanings on his new art, in fact, more than fifty works are analysed."
