

Introducing Zoombies' Innovative Affiliate Dashboard: Revolutionizing Passive Token Earning Opportunities on Moonbeam

Grand Cayman, Cayman Islands Jun 14, 2023 (Issuewire.com) - Zoombies.world is thrilled to announce the launch of their cutting-edge ZOOM Token affiliate dashboard. This revolutionary tool aims to empower players by maximizing their in-game token income potential through a seamless and user-friendly experience.

Zoombies' on-chain affiliate network allows individuals to share their unique affiliate links with others, enabling them to become sponsors and generate the in-game ZOOM token passively from their

sponsored actions. The network has no limits, allowing users to expand their affiliates indefinitely. With each new member added, the potential for earnings increases exponentially.

The newly introduced affiliate dashboard serves as a centralized hub, providing users with a comprehensive overview of their network, earnings, and growth over time. Through this intuitive interface, affiliates can conveniently monitor and manage their network's development, while also gaining access to valuable data insights. Notably, the dashboard features a dedicated section that highlights the global affiliate network's size, the total ZOOM generated by all sponsors in the game, and the top earners and sponsors within the network.

"We are thrilled to unveil our innovative affiliate dashboard, designed to elevate the experience of our valued affiliates," said Ryan Price, CEO at Zoombies. "This tool represents our commitment to providing our community with tools that enhance their Zoombies gaming experience. We believe the dashboard will enable our affiliates to manage their network growth effectively and access important data points, ultimately helping them achieve unprecedented success in the game."

The Zoombies affiliate dashboard offers a range of features and benefits, including:

- **Network Visualization:** Gain a clear understanding of your network's structure, allowing you to easily track your sponsored players and their subsequent actions.
- **Earnings Overview:** Access detailed information about the ZOOM tokens you have earned from your network, helping you monitor your progress.
- **Growth Tracking:** Analyze the growth of your network over time, identifying patterns and making informed decisions to further expand your reach.
- **Global Network Insights:** Stay informed about the overall size of the Global affiliate network, track the total ZOOM generated, and discover the top earners and sponsors in the network.

Zoombies is excited to offer this powerful tool to its affiliates, enabling them to unlock the full potential of their network and effortlessly increase their ZOOM income streams. By leveraging the affiliate dashboard's features, players can streamline their affiliate network management, promote their affiliate links easily, and optimize their earnings.

What are Zoombies?

Zoombies is an infinite world of NFT collectible trading cards built on Rarity, Scarcity, and Community.

The Zoombies World brings all the value and excitement of blockchain NFTs into a tidy free-to-play mix of predictable rules that result in unpredictable outcomes. Zoombies have something for everyone, and when luck strikes, it can take you out of this world! Zoombies is a full-cycle token economy that allows players to mint, trade, and burn NFTs alongside the ZOOM ERC-20 standard token for highly liquid value transfer.

What is Moonbeam?

Moonbeam is a smart contract platform for building cross-chain connected applications that can access users, assets, and services on any chain. By uniting functionality from Ethereum, Cosmos, Polkadot, and more into a single platform, Moonbeam solves today's fragmented user experience — unlocking true interoperability and paving the way for the next generation of applications. The Moonbeam platform uses integrated cross-chain messaging to allow developers to create smart contracts that access services across many remote blockchains. This approach, plus Moonbeam's developer-friendly EVM platform, vast tool support, and modern Substrate architecture create the ideal development environment for building connected applications.
