

BarCloud Introduces Barcode Printing Feature in Inventory Management Mobile App

Users can now easily print barcodes directly from their phones.

New York City, New York Aug 1, 2023 ([IssueWire.com](https://www.issuewire.com)) - BarCloud, the leading provider of innovative [inventory tracking solutions](#), recently announced the launch of a new feature in its [mobile app](#). Now, you can quickly print barcodes right from the app. This latest enhancement aims to provide users with more convenience and uninterrupted workflows.

In this update, users can use their phones to generate and print barcodes directly from barcode printers or even standard printers. This was designed to further simplify manual tasks in inventory tracking, saving valuable time and energy for those managing items in warehouses, stockrooms, or any other facilities.

Some of the benefits of this new feature include:

- A one-step process to easily print barcodes with just one click
- Compatibility with both barcode printers and regular printers

- Eliminates the hassle of switching between the web browser and mobile application

"We are really excited about the launch of the Barcode Printing Feature in the mobile app," said Tim Laurin, a representative from BarCloud. "Our team has worked diligently to create a feature that will make work easier for our users."

To access the new feature, simply update your BarCloud app to the latest version. The feature will be available to all users starting June 23, 2023. For detailed instructions on how to utilize the inventory management app, please [visit their website](#).

BarCloud is a market leader in Inventory System and Asset Tracking Solutions that uses Barcode technology with mobile Barcode, smartphones, and tablets. They help improve profitability by eliminating manual data entry, paper files, and forms and by automating record keeping. With their powerful system, businesses have 24/7 access to the location and status of their Inventory and Assets, whether they are in the warehouse, on the field, or in the office. They have offices in California (headquarters), and Chicago.
