

## Big Ben Introduces Robotic Cleaning Machine, a First in Australia

**Sydney, New South Wales Jul 19, 2023 ([Issuewire.com](http://Issuewire.com))** - Big Ben Services, a renowned provider of commercial kitchen cleaning solutions, announces the introduction of a cutting-edge robotic cleaning machine, imported directly from Europe. This innovative technology marks a significant milestone as the first of its kind to be implemented in Australia.

Traditionally, the challenge of achieving comprehensive cleaning of kitchen exhaust systems throughout their entire length and breadth has persisted.

However, with the introduction of this advanced machine, Big Ben Cleaning Services revolutionizes the cleaning process for [kitchen exhaust systems](#), ensuring unmatched cleanliness and efficiency.

The key feature of the new robotic cleaning machine is its extraordinary 25-meter robotic brush, capable of accessing previously unreachable areas.

Utilizing a patented biodegradable foaming product, Big Ben's robotic cleaning machine effectively cleans dirt and grease from all sides of the ducting system, exhaust fan, and canopy, leaving no corner untouched.

To enhance transparency and quality assurance, the robotic arm is equipped with a video camera, enabling an initial exploratory survey of the duct system. Furthermore, Big Ben Cleaning Services provides comprehensive before and after video reports, ensuring clients witness the exceptional results achieved by the cleaning process.

Harnessing the power of iFoam technology, the [robotic cleaning machine](#) extends its cleaning capabilities beyond kitchen exhaust systems. It thoroughly cleans greasy kitchen equipment, cool rooms, floors, walls, and other essential components within commercial kitchens, delivering unmatched hygiene and cleanliness.
