In Time Tec & Quintet Systems' Strategic Partnership

Jaipur, Rajasthan Jul 31, 2023 (Issuewire.com**)** - In Time Tec and Quintet Systems have signed a strategic business alliance for the global market expansion of 'CALS', a low-code development platform with CEO Park Sung-Yong and In Time Tec core experts.

Quintet Systems focuses on low-code technology and is teaming up with In Time Tec, a global IT company, to lead in the Global market. These two enterprises have joined hands to create a dedicated CALS business team through In Time Tec's expertise panel and talented pool of developers.

Within a month, these two enterprises intend to launch commercialization services. They draw upon their experience of completing the development project for the Test Management System (TMS). Using this experience as a foundation, they aim to offer valuable commercialization services to their clients

shortly.

In Time Tec and Quintet Systems have bigger plans to introduce CALS to overseas markets including the US, Europe, the Middle East, and India.

About In Time Tec:

In Time Tec is a global, award-winning software company that provides innovative software solutions and services. We partner closely with our clients to help them achieve their goals and reach their full potential – together.

Our company promise: until you experience ROI, you do not pay. With eight locations in five different countries, In Time Tec offers offshore, swing-shift, nearshore, and onshore services, including core development, data, quality assurance, UX/UI design, cybersecurity, finance and accounting, and technical writing. We take care of the software development so you can keep doing what you do best.

We partner closely with our clients to supplement and support their teams to build software products focused on achieving business goals. Our commitment to our employees, clients, and partners is to generate a future built on our core values of trust, transparency, integrity, and leadership. From the very beginning, our mission has always been to create abundance — we just happen to build software.
